irish history textbooks: Irish History and the Irish Question Goldwin Smith, 1905

irish history textbooks: *In Search of Ancient Ireland* Carmel McCaffrey, Leo Eaton, 2003-06-11 This engaging book traces the history, archaeology, and legends of ancient Ireland from 9000 B.C., when nomadic hunter-gatherers appeared in Ireland at the end of the last Ice Age to 1167 A.D., when a Norman invasion brought the country under control of the English crown for the first time. So much of what people today accept as ancient Irish history—Celtic invaders from Europe turning Ireland into a Celtic nation; St. Patrick driving the snakes from Ireland and converting its people to Christianity—is myth and legend with little basis in reality. The truth is more interesting. The Irish, as the authors show, are not even Celtic in an archaeological sense. And there were plenty of bishops in Ireland before a British missionary called Patrick arrived. But *In Search of Ancient Ireland* is not simply the story of events from long ago. Across Ireland today are festivals, places, and folk customs that provide a tangible link to events thousands of years past. The authors visit and describe many of these places and festivals, talking to a wide variety of historians, scholars, poets, and storytellers in the very settings where history happened. Thus the book is also a journey on the ground to uncover ten thousand years of Irish identity. *In Search of Ancient Ireland* is the official companion to the three-part PBS documentary series. With 14 black-and-white photos, 6 b&w illustrations, and 1 map.

irish history textbooks: *The Cambridge History of Ireland: Volume 2, 1550–1730* Jane Ohlmeyer, 2018-03-31 This volume offers fresh perspectives on the political, military, religious, social, cultural, intellectual, economic, and environmental history of early modern Ireland and situates these discussions in global and comparative contexts. The opening chapters focus on 'Politics' and 'Religion and War' and offer a chronological narrative, informed by the re-interpretation of new archives. The remaining chapters are more thematic, with chapters on 'Society', 'Culture', and 'Economy and Environment', and often respond to wider methodologies and historiographical debates. Interdisciplinary cross-pollination - between, on the one hand, history and, on the other, disciplines like anthropology, archaeology, geography, computer science, literature and gender and environmental studies - informs many of the chapters. The volume offers a range of new departures by a generation of scholars who explain in a refreshing and accessible manner how and why people acted as they did in the transformative and tumultuous years between 1550 and 1730.

irish history textbooks: *Ireland in the Middle Ages* Seán Duffy, 1996-11-27 This book surveys Irish history in the first half of this millennium, written in a style which will make it accessible to those new to the subject, incorporating the findings of recent research, and offering a reinterpretation of the evidence. Rather than having the English invasion as its starting point, as is previous practice, the volume places it as its centrepiece, and traces in detail the pre-invasion background. While acknowledging the importance of the English invasion as the single most formative development in Irish secular affairs, this book emphasises the importance of politics in native Ireland, which has sometimes in the past been neglected.

irish history textbooks: *Children's Literature Collections* Keith O'Sullivan, Pádraic Whyte, 2017-05-19 This book provides scholars, both national and international, with a basis for advanced research in children's literature in collections. Examining books for children published across five centuries, gathered from the collections in Dublin, this unique volume advances causes in collecting, librarianship, education, and children's literature studies more generally. It facilitates processes of discovery and recovery that present various pathways for researchers with diverse interests in

children's books to engage with collections. From book histories, through bookselling, information on collectors, and histories of education to close text analyses, it is evident that there are various approaches to researching collections. In this volume, three dominant approaches emerge: history and canonicity, author and text, ideals and institutions. Through its focus on varied materials, from fiction to textbooks, this volume illuminates how cities can articulate a vision of children's literature through particular collections and institutional practices.
