2. Interactive Features

Many digital textbooks come with interactive features such as quizzes, videos, and hyperlinks that provide a richer learning experience. These tools can enhance understanding and retention of complex concepts.

3. Cost-Effectiveness

Digital versions are often less expensive than their physical counterparts. Additionally, the ability to highlight, annotate, and search within digital texts can save time and effort when studying for exams or completing assignments.

Textbook Rental Programs

Textbook rental programs have gained popularity as a cost-effective alternative for students. These programs allow students to borrow textbooks for a specified period, usually for the entire semester.

1. Benefits of Rental Programs

Renting textbooks can significantly reduce expenses, as rental prices are typically much lower than purchasing new or used books. This option is particularly advantageous for students who are on a tight budget.

fredonia textbooks: The Stag Cook Book Edited by C Mac Sheridan, 2001-01-20 An excerpt from the INTRODUCTION: COOKING is a gift, not an art. Eating is an art, not a gift. In combination a grace is developed. No great culinary triumph was ever perfected by accident. Charles Lamb's essay on roast pig was responsible for a tidal wave of burnt pork that swept over England in the nineteenth century. Mr. Lamb led a hungry empire to the belief that only through an act of incendiarism could a suckling porker be converted into a delicacy; whereas, as a matter of fact, the perfection of roast pork, golden-brown and unseared by fire, were possible only in the oven. Lucullus, the good Roman gourmet, had his meals cooked in a mint. He required that his masterpieces be served on gold and silver and crystal, and spread on a table of lapis lazuli. The sauces compiled for him were worth more than the food upon which they were poured. He was the high priest of extravagance and luxury. A single meal stood him a fortune. He had more regard for the cost than for the cooking. It is said that his death was hastened by dyspepsia. * * * * In the early seventies a French nobleman, living in the neighborhood of Barbizon, was found seated at the table with his face in a plate of soup. Because of the fact that a butcher knife had been inserted via the back between his fourth and fifth rib on the left side, he was quite dead. Clues led nowhere. It became one of the mysteries. Long afterward an old man tottered into the office of the Prefect and announced that he wished to make a confession. Proceed, said the official. 'Twas I, responded the ancient, who delivered the death stroke to the Duke de la --- thirty-five years ago. What inspired you to make this confession? Pride. I do not comprehend. The details, if you please. By profession I was a chef, said the self-accused. The Duke, at a fabulous price, enticed me into his service. His first request was that I make for him a perfect consomme. Voila! For three days I prepared this perfection. With my own hand I placed before him the soup tureen. With my own hand I ladled it out. He inhaled its divine essence; and then, Your Honor, he reached for the salt. Mon Dieu! I destroy him! The Prefect embraced the artist and took him out to lunch. Thus art was vindicated and the incident closed. In the chemistry of cooking, enough is too much. * * * * The immortals who have contributed recipes to this volume were born with a silver spoon not in their mouths, but in their hands. The cap and apron, not the cap and bells, is the garb in which they perform. Secrets handed

down through generations are thrown with a wanton hand on the pages that comprise this volume. Sauces from the south, chowders from New England, barbecued masterpieces from the west, grilled classics from field and stream, ragouts, stews, desserts, dressings are hung within reach of all, like garlic clusters from the rafters of opportunity. Reach up and help yourself.

fredonia textbooks: *Lives of the Irish Martyrs* David Power Conyngham, 2001-07 The Christian zeal and devotion of the founders of the primitive church in Ireland were only equaled by the great sacrifices and sufferings; endured alike by priests and people, during the fierce and bloody persecutions inaugurated by the Reformers under the sacred garb of religion. The fanatical followers of Mohammed propagated the doctrines of the Koran by the sword; but the Reformers, bloodier far, prostituted the name of religion, and glorified the sacred name of God with their lips, while they butchered his faithful ministers and people, or tortured them in mockery and sport. The persecution, which commenced under Henry, in the early part of the sixteenth century, gradually increased in intensity and cruelty, until it culminated in the middle of the seventeenth, in the most bloody and exterminating scenes on record. England readily embraced Protestantism, Ireland remained Catholic; hence, the war of supremacy and conquest carried on by the former was intensified by all the acerbity of religious hate and fanaticism; and though the roll of those who suffered death for the faith might be said to close with 1745, still the persecutions for religion's sake have come down to our own days.

fredonia textbooks: *Keely and His Discoveries* Clara Bloomfield-Moore, 2001 In the late 1800s John Ernst Worrell Keely claimed to have discovered a source of unlimited energy. For over 30 years his company survived, but never produced a product. This biography (originally published in 1893) seeks to explain the Keely mystery. The author, Clara Bloomfield Moore, financed his work for many years. Opinions on Keely are still sharply divided over a century later - those who call him a free energy pioneer versus those who refer to the Keely Motor Bubble as a stock fraud. Chapter XIX, Latent Force in Interstitial Spaces - Electro-Magnetic Radiation - Molecular Dissociation, was written by Keely. It is not to be wondered at that the magical nature of his demonstrations, more inexplicable than any feats of legerdemain, should have brought upon him the suspicion of fraudulent representation, concerning the production of the force and its manipulation; but his persistency alone in seeking to unravel the mysteries of nature, ought to have brought around him sooner men who, like the revered and great Leidy, were able to appreciate his researches in

sympathetic vibration, the laws of which govern everything in creation, from the movements of the planets, down to the movements of atoms. ... In Keely's theories all is mechanical in nature. A molecule of steel, a molecule of gas, a molecule of brain matter are all of the one primeval substance - the Ether. - Clara Bloomfield Moore

fredonia textbooks: *One Hundred Recipes for the Chafing Dish* Herbert M. Kinsley, 2001 If one spends time with this delightful, little book, he will soon notice that interest moved from the kitchen into the dining room. From preparing food for the family to serving and entertaining guests, and from seeking the bare necessities to desiring the finer things in life. The Civil War had ended only a generation before, and in only a few more years the twentieth century and a definite new age would arrive. It had been only a few years since the first telephone call, and also a few years since the first automobile was offered for sale to the public. The whole American continent was on the move. Americans were looking for the better things in life, so a large silver manufacturing company found it worthwhile to publish a lovely cookbook with some 100 recipes based only on the chafing dish cookery. An attempt was made to put the chafing dish into a historical and cultural context by tracing its history from the ancient Greeks and Romans, to the Middle Ages, into the Age of Discovery, and finally bringing it to the New World in 1720. According to the Introduction, The colonists having overcome the difficulties incidental upon the making of a new country, began to appreciate and to desire the luxuries and adornments of refined living. After reassuring the reader that the sincerest expression of hospitality is to serve with chafing dishes, a long list of useful and not-so-useful recipes is given. Some of them are still as excellent today as they were when the book was written. Among those worth trying are the ones we have translated for the modern cook - Crab Meat a la Newburgh (p. 52), Liver a la Suisse (p. 158), and Rum Omelette (p. 129). It is interesting to note that this little book attempts to give accurate measurements and accurate timings, explaining the conditions under which the dishes were prepared in the company's testing facilities, restaurant-type dishes, such as those recipes which use lobster, crab, oysters and steak, the author also includes wholesome, but very simple dishes such as Frankfurter and Cabbage (p. 158), Welsh Rarebit (p. 178) and Smoked Pigs Jowl (p. 97).
