aca workbooks: Philosophy and Geography III Andrew Light, Jonathan M. Smith, 1998 Places are today subject to contrary tendencies. They lose some functions, which may scale up to fewer more centralized places, or down to numerous more dispersed places, and they gain other functions, which are scaling up and down from other places. This prompts premature prophecies of the abolition of space and the obsolescence of place. At the same time, a growing literature testifies to the persistence of place as an incorrigible aspect of human experience, identity, and morality. Place is a common ground for thought and action, a community of experienced particulars that avoids solipsism and universalism. It draws us into the philosophy of the ordinary, into familiarity as a form of knowledge, into the wisdom of proximity. Each of these essays offers a philosophy of place, and reminds us that such philosophies ultimately decide how we make, use, and understand places, whether as accidents, instruments, or fields of care.

aca workbooks: Strategic Management in the Arts Lidia Varbanova, 2013-01-03 Strategic Management in the Arts looks at the unique characteristics of organisations in the arts and culture sector and shows readers how to tailor a strategic plan to help these diverse organizations meet their objectives. Strategic management is an essential element that drives an organisation's success, yet many cultural organizations have yet to apply strategic thinking and entrepreneurial actions within the management function. Varbanova reviews the existing theories and models of strategic management and then relates these specifically to cultural organisations. Also included are sections on entrepreneurship and innovations in the arts, considering the concept of a 'learning organisation' – an organisation able to adapt its strategy within a constantly changing, complex environment. The book is structured to walk the reader through each element of the strategic plan systematically. With a fresh approach, key questions, examples, international cases to connect theory with practice and suggestions for further reading, this book is designed to accompany classes on strategic planning, cultural management or arts management.

aca workbooks: *Understanding the Arts and Creative Sector in the United States* Joni Maya Cherbo, Ruth Ann Stewart, Margaret Jane Wyszomirski, 2008-05-15 The arts and creative sector is one of the nation's broadest, most important, and least understood social and economic assets, encompassing both nonprofit arts and cultural organizations, for-profit creative companies, such as advertising agencies, film producers, and commercial publishers, and community-based artistic activities. The thirteen essays in this timely book demonstrate why interest in the arts and creative sector has accelerated in recent years, and the myriad ways that the arts are crucial to the social and national agenda and the critical issues and policies that relate to their practice. Leading experts in the field show, for example, how arts and cultural policies are used to enhance urban revitalization, to encourage civic engagement, to foster new forms of historic preservation, to define national identity, to advance economic development, and to regulate international trade in cultural goods and services. Illuminating key issues and reflecting the rapid growth of the field of arts and cultural policy, this book will be of interest to students at both the undergraduate and graduate levels, to arts educators and management professionals, government agency and foundation officials, and researchers and academics in the cultural policy field.

aca workbooks: *Politics and Cultures of Liberation*, 2018-05-29 Politics and Cultures of Liberation: Media, Memory, and Projections of Democracy focuses on mapping, analyzing, and evaluating memories, rituals, and artistic responses to the theme of "liberation." How is the national framed within a dynamic system of intercultural contact zones highlighting often competing agendas of remembrance? How does the production, (re)mediation, and framing of narratives within different social, territorial, and political environments determine the cultural memory of liberation? The articles compiled in this volume seek to provide new interdisciplinary and intercultural perspectives on the politics and cultures of liberation by examining commemorative practices, artistic responses, and audio-visual media that lend themselves for transnational exploration. They offer a wide range of diverse intercultural perspectives on media, memory, liberation, (self)Americanization, and conceptualizations of democracy from the war years, through the Cold War era to the 21st century.
