Spinks, 2017-10-19 'The Peace of God, which passeth all understanding, keep your hearts and minds in the knowledge and the love of God, and of his Son Jesus Christ our Lord.' The Book of Common Prayer, with local variations, is still used in churches inside and outside the Anglican Communion in over 50 countries and in over 150 languages. The Rise and Fall of the Incomparable Liturgy is the first study to trace the evolution and reception of the BCP, from the Elizabethan settlement of 1559 to the Royal Commission report of 1906, when work on a new prayer book was begun. Written by a world authority, here is an illuminating and highly readable account of the ascent and decline of a world classic, which still informs our common language as well as much of the great literature of the past four centuries. It will appeal not only to students of liturgy but also to general readers interested in history, literature, theology and cultural studies.

spire workbooks: *Only by Grace* Anne Sanders Grace, 2019-09-17 Down through the ages, songs have expressed the feelings of people forever. We have the same hopes and dreams, fears, and longings. Only God can meet our needs by His grace, so we must rely upon Him. In this *Only by Grace*, author Anne Sanders Grace has chosen to highlight five songs that express God's love and grace: “Amazing Grace,” “'Twas Grace,” “Rainbow of Grace,” “Marvelous Grace,” and “Only by Grace.” Some are familiar hymns, and some are new ones God gave to her. It is her desire that as you read this book or sing these songs, you will come to realize what a great, amazing, marvelous, loving God we serve—a God who wants to have a relationship with each of us. God is the instigator and the provider of love and grace. But first, we must believe Him and receive His Son Jesus's forgiveness and salvation. And we can only do this by His grace!

spire workbooks: *The Routledge History of Medieval Christianity* R. N. Swanson, 2015-04-10

The Routledge History of Medieval Christianity explores the role of Christianity in European society from the middle of the eleventh-century until the dawning of the Reformation. Arranged in four thematic sections and comprising 23 originally commissioned chapters plus introductory overviews to each part by the editor, this book provides an authoritative survey of a vital element of medieval history. Comprehensive and cohesive, the volume provides a holistic view of Christianity in medieval Europe, examining not only the church itself but also its role in, influence on, and tensions with, contemporary society. Chapters therefore range from examinations of structures, theology and devotional practices within the church to topics such as gender, violence and holy warfare, the economy, morality, culture, and many more besides, demonstrating the pervasiveness and importance of the church and Christianity in the medieval world. Despite the transition into an increasingly post-Christian age, the historic role of Christianity in the development of Europe remains essential to the understanding of European history – particularly in the medieval period. This collection will be essential reading for students and scholars of medieval studies across a broad range of disciplines.

spire workbooks: *Without Absolutes, God Is Not God* Ronald A Train, 2013-01-12 Absolutes As a Christian it is foundational, I believe, to hold to absolutes. For example; a Christian should have absolutes about Gods ontology (the principle of being), absolutes about theology (the study of God), absolutes about Christology (the study of Christ) and absolutes about pneumatology (the study of the Holy Spirit). Each of the foregoing absolutes, I believe, impact upon how one constructs a world view and how one considers the wider implications of Gods kingdom work; hence, why I have titled this collection of essays *Without absolutes, God is not God*. I guess the reader will be asking him or herself why is there a requirement to hold to absolutes. The need for absolutes is not complex. In reality the argument determines whether one is a believer or non-believer in the triune God. A believer will weigh whether God revelationally speaks into this world generally and specifically. A non-believer will object to such a proposition and as a consequence leave him or herself open to other belief systems. To perhaps put it another way a non-believer is faced with the choice of deciding whether God is a reality or whether God is a creation of human imagination. Decision making, then, is crucial when accepting the triune God and his work. Does one make a decision to believe in God empirically or does one make a decision to believe in God from a position of faith? It is my view that God cannot be known empirically (i.e. by trial or experience) but rather he can only be known by faith. However, it depends on how we define faith. Those who accept other belief systems would argue that they too have a faith or a belief in some god or person. In the Christian context, however, faith is an action based on the accepted evidence. In other words if one accepts that the written word of God is substantially true (2 Peter 1:20-21) and that the Word of God (Jesus of Nazareth) is who he is recorded as being or is who he claims to be (John 1:1-5; 14:6-7) then faith is given substance. But I would go further and argue that authentic faith is derived from a spiritual encounter with God which then enables the recipients faith response to be one which is prompted or ignited by God. My argument is supported from Scripture (1 Corinthians 12:9; Ephesians 2:8-9) and

from personal experience. Both of the foregoing references I suggest argue that faith is a gift which has its origin in God. Hence, faith is not only prompted by God but also sustained by him. The analysis of such faith is that it is revelatory and constitutes an utter reliance on who God is and why he exists. Revelatory Faith Evangelicals argue that faith is a gift from God. However, this argument is treated with caution by others. Existentialism suggests that faith is made possible and so granted, by the gracious approach and self-disclosure of being. Interestingly, at this point, there is no great variance between the latter perspective and Martin Luther who argued that faith originates with, or is at least aroused, by God. Contemplating the third article of the Apostles Creed, he wrote: I believe that I cannot of my own reason or strength believe in Jesus Christ, my Lord, or come to him. But the Holy Spirit has called me by the Gospel, enlightened me with His gifts, sanctified and kept me in the true faith. Modernists, also argue that faith constitutes a persons response, but only after having been drawn to Gods work of salvation. This argument suggests faith to be an a priori act of God, an act that prompts recognition that in the Christ, God is endeavouring to share his own life. This arousal of faith, then, affects worship, praise and prayer and the practise of Christian discipleship. The same argument suggests, further, that the prior love of God and the response of love that it generates are what shape a persons Christian faith. Biblical support for these theological reflections is found in Ephesians

spire workbooks: Graphic Encounters Dale Jacobs, 2013-08-29 With the recent explosion of activity and discussion surrounding comics, it seems timely to examine how we might think about the multiple ways in which comics are read and consumed. Graphic Encounters moves beyond seeing the reading of comics as a debased or simplified word-based literacy. Dale Jacobs argues compellingly that we should consider comics as multimodal texts in which meaning is created through linguistic, visual, audio, gestural, and spatial realms in order to achieve effects and meanings that would not be possible in either a strictly print or strictly visual text. Jacobs advances two key ideas: one, that reading comics involves a complex, multimodal literacy and, two, that by studying how comics are used to sponsor multimodal literacy, we can engage more deeply with the ways students encounter and use these and other multimodal texts. Looking at the history of how comics have been used (by churches, schools, and libraries among others) will help us, as literacy teachers, best use that knowledge within our curricula, even as we act as sponsors ourselves.

spire workbooks: The Leadership Secrets of Billy Graham Harold Myra, Marshall Shelley, 2010-06-16 A behind-the-scenes analysis of 21 essential leadership principles from the life of Billy Graham. Billy Graham looms large as one of the twentieth century's most influential and innovative leaders. Most people are unaware of his remarkable effectiveness as not only preacher and pastor, but as a CEO and a global leader as well. The Leadership Secrets of Billy Graham is full of transferable applications for leaders in the church, parachurch, academia, government, and business. Lively interviews with his closest associates illustrate 21 principles that have driven six decades of visionary impact. First-hand accounts reveal stories of courageous leadership and growth through painful lessons. Graham's relentless application of core beliefs and leadership principles have resulted in, among many honors, being listed in Gallup's ten 'most admired men' thirty times, more than anyone else. Time magazine named him one of the top ten leaders of the twentieth century. This book asks: How did this happen? What are the essentials he embraced to achieve such extraordinary results? What can we learn from him and apply to our own leadership roles? This book is dedicated to those readers: who sense the pressing need in today's world for inspired leadership; who rise to leadership's high calling and are willing to carry its weight; who are determined to deepen and expand their capacities and effectiveness.

spire workbooks: A Special Illumination Rollan McCleary, 2017-07-28 Gay spirituality represents a hidden strand in Western thought that was only publically declared from the Gay Liberation of the 1970s. Since coming out, expressions of gay spirituality have proliferated in both number and diversity. Beginning with gay theology within Christianity, the phenomenon has now reached as far as Buddhism and neo-paganism. But, so far, critical analysis of the movement has been very limited largely because gay spirituality has been treated as a political and social

movement arguing for rights and acceptance within religious circles. 'A Special Illumination' offers an in-depth analysis and argues that gay spirituality should be placed at the heart of religion.

spire workbooks: Three Keys to Self-Understanding Pat Wyman, 2001 Self-discovery can be an elusive process. Some people never fully express their true personalities because of obstacles from the past. Others float through life with a set of defense mechanisms that seem adequate until something happens to shake that pattern. In her groundbreaking work, Pat Wyman combines three psychological techniques to create a successful method of personal integration. The foundation of the work is a comparative exploration of how the MBTI? instrument, the Enneagram, and Inner-Child Healing can assist in self-discovery. In the end, it is a strikingly honest and poignant study of how a remarkable group of people dealt with tragedy and abuse, and how they achieved healing through intense introspection and the use of these three modalities. Courageous clients share their stories, poems, artwork, and letters, which are interwoven throughout the author's in-depth explanation of how to guide client's through this process.

spire workbooks: The Rhetorical Leadership of Fulton J. Sheen, Norman Vincent Peale, and Billy Graham in the Age of Extremes Timothy H. Sherwood, 2013-08-15 Fulton J. Sheen, Norman Vincent Peale, and Billy Graham were America's most popular religious leaders during the mid-twentieth century period known as the golden years of the Age of Extremes. It was part of an era that encompassed polemic contrasts of good and evil on the world stage in political philosophies and international relations. The 1950s and early 1960s, in particular, were years of high anxiety, competing ideologies, and hero/villain mania in America. Sheen was the voice of reason who spoke against those conflicting ideologies which were hostile to religious faith and democracy; Peale preached the gospel of reassurance, self-assurance, and success despite ominous global threats; and Graham was the heroic model of faith whose message of conversion provided Americans an identity and direction opposite to atheistic communism. This study looks at how and why their rhetorical leadership, both separately and together, contributed to the climate of an extreme era and influenced a national religious revival.
