catholic religious education textbooks: *International Handbook of the Religious, Moral and Spiritual Dimensions in Education* Marian de Souza, Gloria Durka, Kathleen Engebretson, Robert Jackson, Andrew McGrady, 2007-06-04 Traditionally, spirituality has resided and been contained within religious frameworks but while the links between the two areas are still acknowledged by many in the contemporary world, spirituality is perceived by some as an aspect of human life that is distinct from religion. Consequently, many are searching for meaning within and without religious traditions today and seeking answers to ethical and moral questions that have been generated by the knowledge and technological explosion. One outcome is the renewed interest in the religious, spiritual and moral dimensions of education throughout the life cycle. This *International Handbook* presents the research and professional practice of scholars who are daily engaged in the consideration of these dimensions in education. The result is a collection of essays which reflects the discipline, in all of its internationality, as it is today. Embedded within the chapters is also an agenda for the future, where the religious, moral and spiritual dimensions in education are proposed as an exciting and challenging way forward for educators at all levels in society. As well, it offers a vision for the emergence of a peaceful and just world.

catholic religious education textbooks: *Christian Faith, Formation and Education* Ros Stuart-Buttle, John Shortt, 2017-11-13 This book discusses the relationship between faith, formation and education. Rooted in a variety of discourses, the book offers original insights into the education and formation of the human person, both theoretical and practical. Issues are considered within a context of contemporary tensions generated by an increasingly pluralist society with antipathy to religious faith, and debated from interdenominational Christian perspectives. Including chapters by an international team of experts, the volume demonstrates how Christian faith holds significance for educational practice and human development. It argues against the common assumption that there can be a neutral approach to education, whilst at the same time advocating a critical dimension to faith education. It brings fresh thinking about faith and formation, which demands attention given the fast-changing political, educational and socio-cultural forces of today. It will appeal to students and researchers involved in Christian educational practice.

This volume contains – again on the basis of thirteen key questions – the countries in Southeastern Europe (Albania, Bosnia and Herzegovina, Bulgaria, Kosovo, Republic of North Macedonia, Montenegro, Romania, Serbia and Turkey). Beyond the all-important tasks of taking stock and making international comparisons, the aim of this book is to create a foundation for further action in the field of education, especially with regard to interfaith expertise.
