barber textbooks: N.B.L.B: No Barber Left Behind: The Barber Bible 101: Learn the Business Part of the Barber Business Shahid R. Shabazz, 2015-07-29 No Barber Left Behind (NBLB) was created to fill the void for barbers who want to do more than just cut hair. Cutting hair is what got us started, but there is so much more to the barbering business than just giving a crispy shapeup, a fresh design, or a nice haircut. Either you already have the barbering part down packed or you are on your way, but are you business savvy? Most of us don't have much or any college experience, so NBLB will be a Barbering 101 course, like a Barbering Business for Dummies book, to help us make the most out of this billion-dollar beauty industry. Most things in the beauty industry are stylist or cosmetology influenced, not NBLB. Even though a lot of the business knowledge can be used by stylists, this book is intended to ensure that no barber gets left behind. NBLB was designed to answer the most common questions all new barbers have when it comes to getting started. Like how to advertise, how to build and maintain a healthy clientele, and how to make money from behind the chair. NBLB was also designed for the veteran barber who could use knowledge on business management and incorporating your business. This book can be used as the barbers' bible; it will cover all aspects of the barber business, so take notes, pay attention, and enjoy.

barber textbooks: The Progressive Barber Arnold Drexel, 2015-08-04 Excerpt from The Progressive Barber: A Book for the Apprentice and for the Barber Describing the Anatomy and Physiology, of the Skin, Diseases of the Skin, That Are of Special Interest to the Barber and the Use of Antiseptics and Their Value The author of this book took special pains to avoid as much as possible, all medical terms that may confuse the apprentice, or the barber. The anatomy and physiology of the skin is described in detail, because references are made to them frequently in the after reading. Only the diseases that are of interest to the barber are mentioned. The treatments for the various diseases mentioned were purposely omitted, because the barber is not allowed by law to treat diseases. Only the most valuable antiseptics are recommended. The reader should not condemn the author on account of the so frequently mentioning of alcohol as an antiseptic or a disinfectant, as he considers it the cleanest, strongest and quickest acting disinfectant, which can be easily employed, that leaves no odor, and does no harm to the barber's instruments.
