best financial accounting textbooks: Loose Leaf for Financial Accounting Patricia Libby, Robert Libby, Frank Hodge, 2022-01-21 Libby/Libby/Hodge wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe that accounting is an exciting field of study and one that is important to

future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Financial Accounting 11e successfully implements a real-world, single focus company approach in every chapter. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of if a student has chosen to major in accounting. Libby/Libby/Hodge believes in the building-block approach to teaching transaction analysis. Most faculty agree that mastery of the accounting cycle is critical to success in financial accounting, and yet most financial texts introduce and develop transaction analysis in one chapter, bombarding a student early in the course with an overload of new concepts and terms. The authors slow down the introduction of transactions, giving students time to practice and gain mastery. This building-block approach leads to greater student success in their study of later topics in financial accounting such as adjusting entries.

best financial accounting textbooks: Cognitive Requirement of Accounting Tasks Yijun Zhou, 2022-06-23 Competence orientation has become a defining element of vocational education in German-speaking countries. In this context, tasks are considered the transmission belts to implement the reformed educational standards. In her dissertation the author takes a view on the systematic analysis of task characteristics as a method to inspect the degree of tasks' cognitive requirements. The theoretical-conceptual part of the dissertation gives a psychological and didactical justification of the principles underlying the tasks' cognitive requirement. The effects are analysed in two empirical studies. The first study takes a look on the basis of accounting tasks from Chinese vocational school textbooks, using the structuring content analysis (Mayring, 2008). The second empirical study inspects accounting teachers' perceptions and judgments by interviews. Based on the results, the author develops suggestions for the use of the concept of tasks' cognitive requirement in the didactic training of (prospective) teachers at commercial schools.
