grade 5 teaching textbooks: Understanding Multimodal Discourses in English Language Teaching Textbooks Christopher A. Smith, 2022-08-11 Textbooks are indispensable components and in some case the cornerstones of the mission of English Language Teaching (ELT). However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective; one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions and reifications. The triangulated approach, demonstrated in a series of vignettes featuring Korean university students and

native-English-speaking instructors, can inform textbook choice, instigate change, and inspire lesson re-contextualization to best suit the needs of its primary consumers.

grade 5 teaching textbooks: The Learning and Teaching of Phonological Decoding in Chinese EFL Children Keren Hua, 2024-08-30 This book presents the learning and teaching of phonological decoding in Chinese EFL primary classrooms. The phonological decoding ability of the children is

described, interpreted, and evaluated, the teaching materials are analyzed and the classroom instruction observed, and the links between these various facets are explored using both quantitative and qualitative techniques (textbook analysis, classroom observations, interviews with teachers and a textbook writer, reading test and nonword reading test). This book provides insights into Chinese children's phonological decoding profile, including performance in decoding different types of orthographic units, the strategies children at different levels of reading ability use to sound out vowel graphemes, and their decoding ability in relation to reading ability. The investigation of the teaching practices reveals how the decoding instruction is designed, developed, and delivered to the children and thereby informs the interplay between the classroom instruction and children's development of phonological decoding skills.
