houghton textbooks: Learning From Textbooks Bruce K. Britton, Arthur Woodward, Marilyn Binkley, 2012-11-12 It is surprising that there is so little research on textbooks, given their centrality to teaching and learning in elementary and secondary schools. Textbooks have become a focus of political and cultural controversy, advocating a multicultural curriculum that has sparked some vigorous protests. Research is absent in this debate; therefore, questions of legitimate knowledge, the role of textbooks, textbook design, policy selection issues, and economic issues concerning the marketplace are not part of the current debate. Without insights of research on considerate text, mentioning, illustrations and so forth, the current controversy will result in publishers responding to demands for more content not less; thus, textbooks will become compendia of information that on the surface satisfy everyone. This volume demonstrates how research on important issues relative to textbook design can advance our knowledge about what makes textbooks effective learning tools, and thus inform policymakers, publishers, and those involved in textbook selection. Representing pure and applied approaches, researchers present papers on the quality of writing, the role of questions, the role of pictures and illustrations, and the role of auxiliary materials in the design of effective textbooks. The chapters provide insight into research and its application to textbook design and improvement -- stimulating others to follow this lead.

houghton textbooks: Textbooks in American Society Philip G. Altbach, J Donald Monan Sj Professor of Higher Education and Director Philip G Altbach, Gail P. Kelly, Hugh G. Petrie, Lois Weis, 1991-01-01 In recent years, textbooks have been widely criticized for low standards, lack of imaginativeness, and insensitivity to racial and gender issues. Increasingly, they are cited as another weak link in American public education. This book goes beyond the headlines to examine how textbooks are produced, how they are selected, and what pressures are placed on textbook authors and publishers. The book focuses on the relationship of the textbook to the educational system and includes important issues such as the politics of textbook policy, the determinants of textbook content, the role of textbooks in educational reform, and the process of selection at the state level. The authors offer current research on textbook policy including perspectives from those directly involved with textbooks--from several thoughtful analyses by textbook editors and publishers to the views of California's Superintendent of Public Instruction.

houghton textbooks: History Textbooks American Textbook Council, 1994 Based on expert review and research, this book provides an innovative standard and guide to social studies textbooks used in kindergarten through 12th grade classrooms for content, style, and design. The standards provide a foundation for individuals to select satisfactory textbooks and to help educators and school boards in the adoption of instructional materials. Chapter 1 addresses the problems of textbook content and style. Chapter 2 discusses the vast business of social studies publishing and the increased complexity of textbook packaging with the movement away from state-level adoption of textbooks. Chapter 3 focuses on the content of social studies textbooks with a comparison of past and present textbooks, a discussion of revisionism and reality, and a look at religion in textbooks. Chapter 4 examines the style and story of textbooks and finds that although the content of past textbooks may be flawed, the prose is superior to recent textbooks. Ideas on narrative, readability, vocabulary, instructional design, history, and style provide ways for textbooks to improve. Chapter 5 addresses the issue of format and proposes clarity and simplicity in technical design of books. Chapter 6 provides an outline to review textbooks for content and style and instructional activities and teacher guidance materials for usefulness. Chapter 7 includes an annotated list of the major U.S. and world history textbooks. (CK)

houghton textbooks: The Evolution of the Book Frederick G. Kilgour, 1998-04-23 Distinguished scholar and library systems innovator Frederick Kilgour tells a five-thousand-year story in this exciting work, a tale beginning with the invention of writing and concluding with the emerging electronic book. Calling on a lifetime of interest in the growth of information technology, Kilgour brings a fresh approach to the history of the book, emphasizing in rich, authoritative detail the successive technological advances that allowed the book to keep pace with ever-increasing needs for information. Borrowing a concept from evolutionary theory--the notion of punctuated equilibria--to structure his account, Kilgour investigates the book's three discrete historical forms--the clay tablet, papyrus roll, and codex--before turning to a fourth, still evolving form, the cyber book, a version promising swift electronic delivery of information in text, sound, and motion to anyone at any time. The clay tablet, initially employed as a content descriptor for sacks of grain, proved inadequate to the growing need for commercial and administrative records. Its successor the papyrus roll was itself succeeded by the codex, a format whose superior utility and information capacity led to sweeping changes in the management of accumulated knowledge, the pursuit of learning, and the promulgation of religion. Kilgour throughout considers closely both technological change and the role this change played in cultural transformation. His fascinating account of the modern book, from Gutenberg's invention of cast-type printing five hundred years ago to the arrival of books displayed on a computer screen, spotlights the inventors, engineers, and entrepreneurs who in creating the machinery of production and dissemination enabled the book to maintain its unique cultural power over time. Deft, provocative, and accessibly written, *The Evolution of the Book* will captivate book lovers as well as those interested in bibliographic history, the history of writing, and the history of technology.

houghton textbooks: The Great Speckled Bird Catherine Cornbleth, Dexter Waugh, 2012-12-06 This unique volume takes readers behind the scenes for an insider/outsider view of education policymaking in action. Two state-level case studies of social studies curriculum reform and textbook policy (California and New York) illustrate how curriculum decision making becomes an arena in which battles are fought over national values and priorities. Written by a New York education professor and a California journalist, the text offers a rare blend of academic and journalistic voices. The great speckled bird is the authors' counter-symbol to the bald eagle--a metaphor representing the racial-ethnic-cultural diversity that has characterized the U.S. since its beginnings and the multicultural reality of American society today. The text breaks new ground by focusing on the intersections of national debates and education policymaking. It situates the case studies within historical and contemporary cultural contexts--with particular attention to questions of power and

knowledge control and how influence is exercised. By juxtaposing the contrasting cases of California and New York, the authors illustrate commonalities and differences in education policymaking goals and processes. By sharing stories of participants at and behind the scenes, policymaking comes alive rather than appearing to result from impersonal forces or factors.
