lmu library textbooks: European Book Cultures Stephanie Kurschus, 2014-11-28 Stephanie Kurschus analyses the idea of a common European book culture that integrates the book market as an essential aspect and employs book promotion as balancing instrument. Characteristics of book culture are identified; the resultant concept of book culture provides an overview of the values and myths ascribed to the book. Furthermore, applied book promotion measures are analyzed for their effectiveness and best practice models. Since, in a context determined by culture and market, preservation and innovation, book promotion fulfills two functions: it is to protect the unique national characteristics of book culture as well as to support its continuous development. To adapt and to advance within a changing environment is critical to the survival of book culture in the digital reality.

lmu library textbooks: Museum Communication and Social Media Kirsten Drotner, Kim Christian Schröder, 2014-03-14 Visitor engagement and learning, outreach, and inclusion are concepts that have long dominated professional museum discourses. The recent rapid uptake of various forms of social media in many parts of the world, however, calls for a reformulation of familiar opportunities and obstacles in museum debates and practices. Young people, as both early adopters of digital forms of communication and latecomers to museums, increasingly figure as a key target group for many museums. This volume presents and discusses the most advanced research on the multiple ways in which social media operates to transform museum communications in countries as diverse as Australia, Denmark, Germany, Norway, the UK, and the United States. It examines the socio-cultural contexts, organizational and education consequences, and methodological implications

of these transformations.

Imu library textbooks: *Pedro and Ricky Come Again* Jonathan Meades, 2021-03-18 This landmark publication collects three decades of writing from one of the most original, provocative and consistently entertaining voices of our time. Anyone who cares about language and culture should have this book in their life. Thirty years ago, Jonathan Meades published a volume of

reportorial journalism, essays, criticism, squibs and fictions called *Peter Knows What Dick Likes*. The critic James Wood was moved to write: 'When journalism is like this, journalism and literature become one.' *Pedro and Ricky Come Again* is every bit as rich and catholic as its predecessor. It is bigger, darker, funnier, and just as impervious to taste and manners. It bristles with wit and pin-sharp eloquence, whether Meades is contemplating northernness in a German forest or hymning the virtues of slang. From the indefensibility of nationalism and the ubiquitous abuse of the word 'iconic', to John Lennon's shopping lists and the wine they call Black Tower, the work assembled here demonstrates Meades's unparalleled range and erudition, with pieces on cities, artists, sex, England, concrete, politics and much, much more.

Imu library textbooks: *Proximity to History* Walt Smith, 2023-01-11 Growing up in the hills of East Tennessee, only wearing shoes during the school year, Doug Smith was a child of the Depression, who joined the US Navy during the World War II. Though he had never before seen an ocean, he became the skipper of a patrol torpedo (PT 138) boat in the South Pacific. Seeking and sinking enemy cargo ships and severing Japanese supply lines, Ensign Smith had a front-row seat to the first use of kamikaze aircraft and the last clash of battleships in history. Twice held back in elementary school, he worked in punishing Ohio steel mills for college tuition. Ultimately earning his doctorate in psychology from the University of Michigan, he went on to teach at two universities and to become the founding president of Francis Marion University. Doug Smith personified the best qualities of his generation, personal responsibility, faithful commitment, a strong work ethic and prudent saving. The story of Walter Douglas Smith is the intersection of a colorful life journey and the history he passed through from 1918 to 2018.

Imu library textbooks: *Chemistry in Primetime and Online* National Research Council, Division on Earth and Life Studies, Board on Chemical Sciences and Technology, Chemical Sciences Roundtable, 2011-08-01 It is critical that we increase public knowledge and understanding of science and technology issues through formal and informal learning for the United States to maintain its competitive edge in today's global economy. Since most Americans learn about science outside of school, we must take advantage of opportunities to present chemistry content on television, the Internet, in museums, and in other informal educational settings. In May 2010, the National Academies' Chemical Sciences Roundtable held a workshop to examine how the public obtains scientific information informally and to discuss methods that chemists can use to improve and expand efforts to reach a general, nontechnical audience. Workshop participants included chemical practitioners (e.g., graduate students, postdocs, professors, administrators); experts on informal learning; public and private funding organizations; science writers, bloggers, publishers, and university communications officers; and television and Internet content producers. *Chemistry in Primetime and Online* is a factual summary of what occurred in that workshop. *Chemistry in Primetime and Online* examines science content, especially chemistry, in various informal educational settings. It explores means of measuring recognition and retention of the information presented in various media formats and settings. Although the report does not provide any conclusions or recommendations about needs and future directions, it does discuss the need for chemists to connect more with professional writers, artists, or videographers, who know how to communicate with and interest general audiences. It also emphasizes the importance of formal education in setting the stage for informal interactions with chemistry and chemists.
