oer french textbooks: Contextualised open educational practices Jako Olivier, Charlene du Toit-Brits, Byron J. Bunt, Amit Dhakulkar, 2022 This book covers original research on the implementation of open educational practices through the use of open educational resources at the university level. The emphasis on open education in this book is on contextualising resources, supporting student agency and fostering self-directed learning specifically within a South African milieu. The envisaged chapters cover conceptual and review research and empirical work focussing on open educational practices and the use of renewable assessments. The work starts off with an overview of an institutional-wide open education project that prompted the research followed by research on open education in terms of various modules in the health science, music education, law, philosophy, dietetics, anthropology, French language learning, journalism and political science. There is a clear gap in the literature on open education in terms of open educational practices, specifically in terms of contextualising resources, supporting student agency and fostering self-directed learning in a South African context. Despite the existence of some general works on open education in terms of policy, social justice and open textbooks, this book will be unique in exploring the intersections of openness, specifically with contextualisation, student agency and self-directedness.

oer french textbooks: Open Development Matthew L. Smith, Katherine M. A. Reilly, 2014-01-10 Experts explore current theory and practice in the application of digitally enabled open networked social models to international development. The emergence of open networked models made possible by digital technology has the potential to transform international development. Open network structures allow people to come together to share information, organize, and collaborate. Open development harnesses this power, to create new organizational forms and improve people's lives; it is not only an agenda for research and practice but also a statement about how to approach international development. In this volume, experts explore a variety of applications of openness, addressing challenges as well as opportunities. Open development requires new theoretical tools that focus on real world problems, consider a variety of solutions, and recognize the complexity of local contexts. After exploring the new theoretical terrain, the book describes a range of cases in which open models address such specific development issues as biotechnology research, improving education, and access to scholarly publications. Contributors then examine tensions between open models and existing structures, including struggles over privacy, intellectual property, and implementation. Finally, contributors offer broader conceptual perspectives, considering processes of social construction, knowledge management, and the role of individual intent in the development and outcomes of social models. oer french textbooks: Education For All: Ten years of open education luminaries from around the world David T. Kindler, Marcela Morales, Paul Stacey, 2021-12-07 Education for all is a bold, audacious statement. But that is the very goal of open education. Can you imagine a world where access to education materials is free? Where teachers and learners have the right to reuse, revise, remix, localize and translate those materials? Where copies of textbooks and course materials can be retained without cost? Can you imagine a world where teachers and learners co-create education together? A world where learners engage in assignments that generate global public goods benefiting everyone? You may say this isn't possible, but open educators around the world have been doing this for years. Building on the work of luminaries such as those featured in this book, open education has grown into a global movement transforming education. Each year, Open Education Global opens up nominations for awards to the entire global open education community.

As part of the 10th anniversary of these awards, OEGlobal is publishing this Education For All book, collecting all ten years of award winners into a single volume. This book is a celebration of their achievements.
