pearson plus textbooks: *The Trouble with Textbooks* Gary A. Tobin, Dennis R. Ybarra, 2008-07-31 School textbooks in Iran, Saudi Arabia, Egypt and elsewhere in the Arab and Muslim worlds are filled with anti-Western and anti-Israel propaganda. Most readers will be shocked to discover that history and geography textbooks widely used in America's elementary and secondary classrooms contain some of the very same inaccuracies about Jews, Judaism, and Israel. Did you know that there is no record of any important Jewish contribution to the sciences? (World Civilizations, Thomson Wadsworth). Or that Christianity was started by a young Palestinian named Jesus? (The World, Scott Foresman/Pearson). Supplemental materials and other classroom influences are even worse. The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel. The problems uncovered in this ground-breaking analysis are instructive, and illustrate the need for reform in the way textbooks are developed, written,

marketed, and distributed. Substitute another area-how we teach American history, Western civilization, or comparative religion-and we have another, equally intriguing case study. The Trouble with Textbooks shows what can go terribly wrong in discussing religion, geography, culture, or history-and in this case-all of them. The Trouble with Textbooks tells a cautionary tale for all readers, whatever their background, of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life, instead disparage some groups and teach historical distortions. With millions of young people using these textbooks each year, the denigration of some should be a concern for all.

pearson plus textbooks: *Art, Literature and Religion in Early Modern Sussex* Andrew Hadfield, 2016-04-15 Art, Literature and Religion in Early Modern Sussex is an interdisciplinary study of a county at the forefront of religious, political and artistic developments in early-modern England. Ranging from the schism of Reformation to the outbreak of Civil War, the volume brings together scholars from the fields of art history, religious and intellectual history and English literature to offer new perspectives on early-modern Sussex. Essays discuss a wide variety of topics: the coherence of a county divided between East and West and Catholic and Protestant; the art and literary collections of Chichester cathedral; communities of Catholic gentry; Protestant martyrdom; aristocratic education; writing, preaching and exile; local funerary monuments; and the progresses of Elizabeth I. Contributors include Michael Questier; Nigel Llewellyn; Caroline Adams; Karen Coke;

and Andrew Foster. The collection concludes with an Afterword by Duncan Salkeld (University of Chichester). This volume extends work done in the 1960s and 70s on early-modern Sussex, drawing on new work on county and religious identities, and setting it into a broad national context. The result is a book that not only tells us much about Sussex, but which also has a great deal to offer all scholars working in the field of local and regional history, and religious change in England as a whole.

pearson plus textbooks: Resurgent Julian Birkinshaw, John Fallon, 2025-07-17 A practical handbook examining how established businesses can use their unique advantages to fight back and win in a digital arena too often dominated by tech start-ups, disruptors and unicorns. The big tech companies (Alphabet, Amazon, Apple, Meta, Microsoft) have had an enormous impact on our everyday lives. A new wave of start-ups in the tech sector has dominated the press and swallowed up huge amounts of investment. But what about those established companies in the traditional parts of the world's economies, from energy, industrial and consumer goods to travel and health? They rarely got a mention. Everyone was talking about the disrupters – the start-ups and the entrepreneurs – and not about the incumbents. This book is a call for a reality check. For at the core of our established companies are capabilities and qualities that remain highly relevant in the digital age. They are often market leaders for very good reasons – they know their customers and markets well, and they have great product, sales and marketing expertise. They are operationally savvy and financially strong, with deep insights into areas of expertise that no one else has, giving them a unique advantage. John Fallon and Julian Birkinshaw have come to a clear conclusion: incumbents are not going quietly into that dark night. Organizations will need to jettison their analogue baggage and infrastructure and embrace digital transformation. They will survive and they will prosper. And this shows how they are doing it.
