japanese college textbooks: Learn Japanese John Young, Kimiko Nakajima-Okano, 1984-02-01 After fifteen printings, the Learn Japanese: College Text series has been substantially revised. The incorporated revisions grew out of the authors' decade and more of classroom experience. Revisions were also made in accordance with recommendations proposed by instructors who have used the Learn Japanese series. The new edition, which reflects recent trends in language teaching, continues to emphasize an integrated approach in which speaking, hearing, reading, and writing Japanese all contribute to the language learning process. - The most significant improvement is the addition of Culture Notes to help clarify the sociolinguistic context in which the language is used. Since Japanese modes of communication are highly situational, the student of Japanese needs to be made aware of the different contexts in which speakers interact. Culture Notes, used in conjunction with Grammar Notes, Dialogs, and Useful Expressions, show how an understanding of cultural values and human relationships can enhance the student's mastery of language skills. - A new approach to language learning is used throughout the revised edition. The new sociolinguistic approach (which encourages the generation of discourse) is integrated with the original pattern approach (which encourages the generation of sentences). - Many components of the first edition, such as Sentence Patterns, Grammar Notes, and Reviews, have been revised and/or rearranged. The result is a

clearer, more natural, and more functional presentation of the Japanese language. The four volumes of Learn Japanese: New College Text were prepared by the Asian Division of the University of Maryland University College and are published by the University of Hawaii Press.

japanese college textbooks: The History of Modern Japanese Education Benjamin Duke, 2008-12-30 The History of Modern Japanese Education is the first account in English of the construction of a national school system in Japan, as outlined in the 1872 document, the Gakusei. Divided into three parts tracing decades of change, the book begins by exploring the feudal background for the Gakusei during the Tokugawa era which produced the initial leaders of modern Japan. Next, Benjamin Duke traces the Ministry of Education's investigations of the 1870s to determine the best western model for Japan, including the decision to adopt American teaching methods. He then goes on to cover the eventual reverse course sparked by the Imperial Household protest that the western model overshadowed cherished Japanese traditions. Ultimately, the 1890 Imperial Rescript on Education integrated Confucian teachings of loyalty and filial piety with Imperial ideology, laying the moral basis for a western-style academic curriculum in the nation's schools.

japanese college textbooks: Rethinking Language and Culture in Japanese Education Shinji Sato, Neriko Musha Doerr, 2014-04-01 How does language or culture come to be standardized to the degree that it is considered 'homogeneous'? How does teaching language relate to such standardization processes? How can teaching be mindful of the standardization processes that potentially involve power relations? Focusing on the case of Japanese, which is often viewed as homogenous in terms of language and culture, this volume explores these questions in a wide range

of contexts: the notions of translation and modernity, the ideologies of the standardization of regional dialects in Japan, current practices in college Japanese-as-a- Foreign-Language classrooms in the United States, discourses in journals of Japanese language education, and classroom practices in nursery and primary schools in Japan. This volume's investigation of standardization processes of Japanese language and culture addresses the intersections of theoretical and practical concerns of researchers and educators that are often overlooked.

japanese college textbooks: **Enacting Moral Education in Japan** Sam Bamkin, 2024-03-15 Drawing on the case of moral education reform, this book provides an authoritative picture of how policy is enacted between state policymaking and school practice in Japan, focusing on how national policy is enacted locally in the classroom. The study follows the 2015 moral education reform from its genesis in central government, through the Ministry of Education to its enactment by local government and schools. The book looks beyond written policies, curricula and textbooks to examine how teachers, school administrators and others make sense of, and translate, policy into practice in the Japanese classroom context. Chapters explore how moral education practice has changed in response to the intentions of national policy, and analyzes the implications for understanding processes of policy enactment in the Japanese education system. This book presents a new perspective on the complexity of education policy making, practice, and the gaps in between. It will be of interest to postgraduate students, researchers, and academics in the fields of education policy and politics, moral education, school administration, and international and comparative education more broadly, particularly in Asia.

japanese college textbooks: *Imagining Japan in Post-war East Asia* Paul Morris, Naoko Shimazu, Edward Vickers, 2014-03-26 In the decades since her defeat in the Second World War, Japan has continued to loom large in the national imagination of many of her East Asian neighbours. While for many, Japan still conjures up images of rampant military brutality, at different times and in different communities, alternative images of the Japanese 'Other' have vied for predominance - in ways that remain poorly understood, not least within Japan itself. *Imagining Japan in Postwar East Asia* analyses the portrayal of Japan in the societies of East and Southeast Asia, and asks how and why this has changed in recent decades, and what these changing images of Japan reveal about the ways in which these societies construct their own identities. It examines the role played by an imagined 'Japan' in the construction of national selves across the East Asian region, as mediated through a broad range of media ranging from school curricula and textbooks to film, television, literature and comics. Commencing with an extensive thematic and comparative overview chapter, the volume also includes contributions focusing specifically on Chinese societies (the mainland PRC, Hong Kong and Taiwan), Korea, the Philippines, Malaysia and Singapore. These studies show how changes in the representation of Japan have been related to political, social and cultural shifts within the societies of East Asia - and in particular to the ways in which these societies have imagined or constructed their own identities. Bringing together contributors working in the fields of education, anthropology, history, sociology, political science and media studies, this interdisciplinary volume will be of interest to all students and scholars concerned with issues of identity, politics and culture in the societies of East Asia, and to those seeking a deeper understanding of Japan's fraught relations with its regional neighbours.
