ncert textbooks class 9: Transformative Pedagogic Practice Stephanie Leder, 2018-12-08 This book explores how the transnational Education for Sustainable Development (ESD) policy is being translated into formal school education in India. Stephanie Leder investigates the ESD's transformative potential for pedagogic practice and builds a set of principles for how the global objectives of the ESD can be interpreted in diverse socio-cultural contexts. Her approach for transformative pedagogic practice emphasizes the promotion of a critical consciousness through argumentation skills. Using the case of water conflicts in geography education in India, the book reveals the contradictions between ESD objectives and curricula, syllabi, textbooks and classroom teaching at secondary schools in Pune, Maharashtra. Leder's approach demonstrates how principles of schooling can be altered towards learner-centered, problem-posing and network-thinking teaching approaches to empower students towards reflective decision-making on the sustainable use of natural resources.

ncert textbooks class 9: *India Social Development Report 2023* Indira Hirway, 2024-01-20 This report highlights that gender inequalities and women's subordination in India are caused by two formidable macro-structures: patriarchy and the exclusion of unpaid work from the macro-economy. Both these structures reinforce each other and negatively impact women's empowerment. Patriarchy imposes subordination on women and forces a disproportionately higher share of unpaid domestic services and unpaid care onto them. This is unfair and unjust - a violation of basic human rights. Other structures like race, religion, and caste cut across these main structures. The selected papers in this report show how patriarchy causes gender inequalities in all critical dimensions of women's life on the one hand, and how unpaid domestic services and unpaid care sustains the macro-economy and its growth on the other. The contributors discuss pathways to integrate unpaid work with the macro-economy such that the strength of patriarchy declines and at the same time gender equality is promoted. To put it differently, unless the structures are addressed by integrating unpaid work, inequalities cannot be addressed effectively. The report emphasizes that this is the only way to move to real macroeconomics. The papers have explored pathways to break these structures gradually to achieve gender equality and empower women. Though the path is challenging, it is feasible to reach the goal of pervasive gender equality.
