teaching textbooks phone number: *Understanding Multimodal Discourses in English Language Teaching Textbooks* Christopher A. Smith, 2022-08-11 Textbooks are indispensable components and in some case the cornerstones of the mission of English Language Teaching (ELT). However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective; one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text

but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions and reifications. The triangulated approach, demonstrated in a series of vignettes featuring Korean university students and native-English-speaking instructors, can inform textbook choice, instigate change, and inspire lesson re-contextualization to best suit the needs of its primary consumers.

teaching textbooks phone number: First Contact Nancy A. Greenwood, Jay R. Howard, 2011-08-16 The Introduction to Sociology course is usually the first contact that students have with the discipline of sociology. This course can determine whether students take other sociology courses or learn to use sociology in their lives as adults and citizens. First Contact identifies important issues facing instructors in introducing students to the sociological imagination. Drawing on the literature of teaching and learning in sociology and higher education more broadly, First Contact provides an overview of the scholarship of teaching and learning, best practices, and other essential information to create a successful first course in sociology. It walks the instructor through the course design process—from learning about whom your students are, determining appropriate course goals and learning objectives, and using these ideas to design, execute, and assess your course. It examines the core content of a first course. It discusses how to design a syllabus, select textbooks and readings, as well as how to design and deliver effective lectures, facilitate good discussions, and other course delivery options. An invaluable resource for anyone teaching the introductory sociology course - including grad students, new professors, and seasoned instructors who seek renewal in their approach to teaching this critical course in the sociology curriculum.

teaching textbooks phone number: Science Teaching Reconsidered Committee on Undergraduate Science Education, Board on Science Education, Division of Behavioral and Social Sciences and Education, National Research Council, 1997-03-26 Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. Science Teaching Reconsidered provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

teaching textbooks phone number: 8 Great Smarts for Homeschoolers Tina Hollenbeck, 2021-08-03 Kids don't just learn one way . . . and that matters a lot for homeschool parents. One benefit of a home education is a curriculum designed to fit each student. But that means knowing how your child learns. It's up to the teacher to figure out the best way to reach each one. Based on the 8 Smarts identified by Kathy Koch—word, logic, picture, music, body, nature, people, and self—8 Great Smarts for Homeschooling Families tailors these ideas to the unique setting of the home classroom. Tina Hollenbeck, a leader in the homeschool community, applies the 8 Smarts to each division of a complete curriculum. Yet the real benefit of homeschooling is personal relationships. Hollenbeck shows that when parents know their kids' multiple intelligences, it produces a healthy homeschool dynamic. So don't try to teach in the dark. Know your kid's smarts, then watch them truly learn.

teaching textbooks phone number: **Understanding the Music Business** Richard Weissman, 2015-09-30 Understanding the Music Business offers students a current overview of the music business. Going beyond what most music business texts offer, Weismann delivers a contemporary approach that addresses the unanswered questions for today's music students, such as, Is it really possible to make a living as musician? Understanding the Music Business covers the basics in the first part of the text. This first section deals with the fundamentals of the industry, including recording, music publishing, agents, managers, radio and television, unions, the internet and new technology, and regional and international music markets. However, it is the second half of the text that breaks new ground by covering the career paths of new artists in the industry, the development and need for entrepreneurial skills, and the ways that individuals forge careers in the industry.

teaching textbooks phone number: Perspectives in Curriculum Studies A Zama, N. Endeley, 2021-08-19 Perspectives in Curriculum Studies by Margaret Nalova Endeley and Martha Ashuntantang Zama is a comprehensive textbook for graduate students of Curriculum Studies and Instruction, and a guide for education practitioners wherein they articulate contemporary curriculum concepts, principles and applications in the field. With illustrations from informed African perspectives, the authors situate curriculum theory and practice in local contexts so that African scholars, educators, and others may be equipped with knowledge and skills to develop and maintain appropriate and relevant curricula for quality education. Framed in sixteen chapters, grouped in five parts, the text begins with the exposition of basic terminology, curriculum theory and foundations of the curriculum before delving profoundly into the curriculum development process.

The latter portion gives the reader the opportunity to explore, analyse and evaluate different curriculum planning approaches and models, curriculum design dimensions and patterns, and procedures for the development of syllabuses, textbooks, and other curriculum materials. Also, Curriculum implementation tasks as well as strategies for evaluation of programs and courses are presented and discussed. Since curriculum and instruction are highly intertwined notions, instructional design is elaborately treated in two chapters bringing out its theoretical underpinnings and procedures. The book closes with global perspectives of curriculum development in practice. The goal here is to provide insights into trends, issues, and challenges not only in curriculum development but also in the curriculum field, which should generate action towards the improvement of curriculum practice and spur the search for new knowledge.
