teaching textbooks customer service: Understanding Multimodal Discourses in English Language Teaching Textbooks Christopher A. Smith, 2022-08-11 Textbooks are indispensable components and in some case the cornerstones of the mission of English Language Teaching (ELT).

However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective; one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions and reifications. The triangulated approach, demonstrated in a series of vignettes featuring Korean university students and native-English-speaking instructors, can inform textbook choice, instigate change, and inspire lesson re-contextualization to best suit the needs of its primary consumers.

teaching textbooks customer service: Vietnamese Language, Education and Change In and Outside Vietnam Phan Le Ha, Dat Bao, Joel Windle, 2024-05-21 This open access edited book attempts to break new ground in investigating multiple facets of Vietnamese language, education and change in global contexts, engaging with global Vietnam through complex lenses of language and education. Issues of language, globalization, and global identities have often been framed through the lens of hierarchical/binary power relations, and/or through a dichotomy between hyper-central languages, such as English, and revisualized or marginalized local language and cultures. In this book, this dichotomy is turned on its head by considering how Vietnam and Vietnamese are constructed in and outside Vietnam and enacted in global spaces of classrooms, textbooks, student mobility, community engagement, curriculum, and intercultural contacts. Vietnamese is among the world's most spoken languages and is ranked in the top 20th in terms the number of speakers. Yet, at the same time, as a 'peripheral' or 'southern' global language as often seen in the Global North-Global South spectrum, the dynamics of multilingual and multicultural encounters involving Vietnamese generate distinctive dilemmas and tensions, as well as pointing to alternative ways of thinking about global phenomena from a fresh angle. Rather than being outside of the global, Vietnamese - like many other 'non-central' global languages - is present in diasporas, commercial, and transnational structures of higher education, schooling, and in the more conventional settings of primary and secondary school, in which visions of culture and language also evoke notions of heritage and tradition as well as bring to the fore deep seated ideological conflicts across time, space, communities, and generations. Relevant to students and scholars researching language, education, identity, multiculturalism, and their intersections, particularly related to Vietnam, but also in Southeast Asia and beyond, this volume is a pioneering investigation into overlooked contexts and languages from a global, southern-oriented perspective. This book presents an eclectic collection of 15 chapters unified by an interest in developing and teaching the Vietnamese language. To my knowledge, there has been no previous attempt to make the national language of Vietnam a focus for as many perspectives as are documented in the book. In this regard, the book makes an original and intriguing contribution to the literature on Vietnamese culture, including the culture of Vietnam's expanding diaspora. The book is pioneering in the extent to which it draws attention to the many roles played by a national language in a nation's political, social and cultural development. It also documents the challenges of preserving a national language in settings where it is at risk of being marginalized. It is pleasing that so many of the contributing authors are young Vietnamese scholars who can provide a distinctly Vietnamese perspective on concepts and practices of global significance. - Dr. Martin Hayden, Emeritus Professor of Higher Education, Southern Cross University, Australia Vietnamese Language, Education and Change In and Outside

Vietnam brings together an excellent collection of chapters that highlight the diverse and important but under-explored roles Vietnamese language plays in different settings within and outside Vietnam. The fifteen chapters of this much needed book provide unique insights into various aspects and meanings of Vietnamese language. Collectively, the volume contributes to broadening our view about the evolution and transformation of Vietnamese language under the impacts of local, national, regional and global forces. The book invites readers to engage in a reflective and intersectional approach to rethinking and re-examining our understandings of the changes and developments of Vietnamese language over the history of the country. - Dr Ly Tran, Professor, Centre for Research for Educational Impact (REDI), Deakin University, Australia, and Founder: Australia-Vietnam International Education Centre

teaching textbooks customer service: Multilingual Education Yearbook 2020 Wenhao Tao, Indika Liyanage, 2020-02-27 This book focuses on the challenges of teaching in diversely multilingual classrooms, discussing how these challenges and complexities interact in the preparation of teachers (language & content areas) in and for multilingual settings, and how they impact on educational processes, developments, and outcomes. Teacher education in multilingual contexts is a key topic and occupies an important position in efforts to improve educational outcomes and quality for all stakeholders. It is seen as essential for competitive participation in global economic activity and for providing opportunities to enjoy the benefits of increased prosperity. Teacher education is generally expected to address both the demand for multilingualism and the challenges of teaching in diversely multilingual classrooms, which are important foci at policy and institutional levels. For example, the demand for quality outcomes is manifested in state-administered standards and performance cultures that regulate entry and practices, and poses ethical and pedagogic dilemmas for teachers. This book presents high-quality empirical research on education in multilingual societies, highlighting findings that, in addition to providing descriptions of language learning, development, and use in language contact and multilingual contexts, will help shape future language education policy and practices in multilingual societies.

teaching textbooks customer service: Information Resources on the Care and Welfare of Beef Cattle Cynthia Petrie Smith, 2004 One of the main animal welfare concerns in beef cattle production is that of pain and distress. Dehorning, castration, and branding are husbandry procedures which can cause pain and discomfort. Less acute but still distressful are those issues related to the animal environment. Extreme natural conditions can result in cattle that are heat and/or cold stressed. Drought and the resulting overstocking for available feed resources can also reduce body fatness. These are important welfare issues in modern beef production. The following bibliography explores these issues and more and should provide a useful resource for scientists, veterinarians, extension specialists, students, and others.
