russian website for textbooks: The New Russian Book Birgitte Beck Pristed, 2017-08-01
This book takes up the obtrusive problem of visual representation of fiction in contemporary Russian book design. By analyzing a broad variety of book covers, the study offers an absolutely unique material that illustrates a radically changing notion of literature in the transformation of Soviet print culture to a post-Soviet book market. It delivers a profound and critical exploration of Russian visual imaginary of classic, popular, and contemporary prose. Among all the carelessly bungled covers of mass-published post-Soviet series the study identifies gems from experimental designers. By taking a comparative approach to the clash of two formerly separate book cultures, the Western and the Soviet, that results both in a mixture of highbrow and lowbrow forms and in ideological re-interpretations of the literary works, this book contributes to opening an East-West dialogue between the fields of Russian studies, contemporary book and media history, art, design, and visual studies.

Russian and East European Books and Manuscripts in the United States, the first collection of its kind, offers perspectives from leading Slavic librarians, archivists and historians on the cultural history of Russian and East European exiles and immigrants to North America in the twentieth century. russian website for textbooks: (Re)Constructing Memory: School Textbooks and the Imagination of the Nation James H. Williams, 2014-08-08 This book examines the shifting portrayal of the nation in school textbooks in 14 countries during periods of rapid political, social, and economic change. Drawing on a range of analytic strategies, the authors examine history and civics textbooks, and the teaching of such texts, along with other prominent curricular materials—children's readers, a required text penned by the head of state, a holocaust curriculum, etc.. The authors analyze the uses of history and pedagogy in building, reinforcing and/or redefining the nation and state especially in the light of challenges to its legitimacy. The primary focus is on countries in developing or transitional contexts. Issues include the teaching of democratic civics in a multiethnic state with little history of democratic governance; shifts in teaching about the Khmer Rouge in post-conflict Cambodia; children's readers used to define national space in former republics of the Soviet Union; the development of Holocaust education in a context where citizens were both victims and perpetrators of violence; the creation of a national past in Turkmenistan; and so forth. The case studies are supplemented by commentary, an introduction and conclusion.

russian website for textbooks: Narrating the Soviet Era in Russian School History Textbooks Olga Konkka, 2025-09-03 This study focuses on how Russian history textbooks published between 1992 and 2021 dealt with the topic of the Soviet period (1917-1991). Representations of this part of Russia's past in school manuals have provoked vivid debates and bolstered government intervention in the field, while a gradual shift towards a less critical narrative of the USSR in more recent textbooks is often presented as directed by Vladimir Putin. This study combines research into these texts and inquiry into those who write, publish, approve, or criticize them. Bringing together these perspectives provides a more complex view of school textbooks as final products of both top-down and bottom-up processes. This volume is aimed at postgraduates, researchers, and academics specializing in Soviet history, contemporary Russian politics and society, and history education and textbooks.

russian website for textbooks: South Asia Defence And Strategic Year Book - 2009 General Deepak Kapoor,, AVSM PVSM, SM VSM Chief of Army Staff (India), 2009 The third edition of the South Asia Defence and Strategic Year Book offers an analysis of defence, economic and social issues that impact regional security in South Asia. The wide ranging perspectives give a deep insight into the factors and linkages that impact the emerging international relations of the region, with particular emphasis on India which is an economic, military and political powerhouse with an expanding footprint in the World. South Asia is a region that is rife with geopolitics. By virtue of its population and location, it is a reflection of the challenges of the interconnected, integrated and interdependent world. Its security environment is relatively unsettled and is a reason for both hope and despair. Its issues, which have international as well as regional relevance, have their own dynamics and trends that need a deeper understanding. The Year Book aims to provide a comprehensive overview of the security environment in the region by focusing on an in-depth analysis of military capabilities and strategic imperatives obtaining in the region. Apart from outlining the general security environment, detailed military balance, trends in weapon systems and technology, defence industry, missile and nuclear capabilities and terrorism issues have been highlighted. Growing strategic linkages and independence of nation states make it imperative to consider the region as a whole to incorporate a holistic approach. The Year Book also contains studies on China and other Southeast Asian nations to that effect. Thus the underlying theme of this publication is to enable 'understanding through information'. While the threat of terrorism remains at the forefront of most analyses, the move towards popular and democratically elected governments in South Asia has not eclipsed the existing challenges to governance in all the countries of the region. Poverty and economic disparities, coupled with ethnic and social divisions, have created political and social fault lines that have been exploited by non-state actors with their own agendas. Thus we hope to promote peace through understanding by delineating the issues of concern in the region.

russian website for textbooks: The Tesla Secret, Books 1, 2 & 3 Mike Wells, 2019-12-11 When a Stanford University physicist is kidnapped and whisked away to a top-secret research facility near Moscow, he finds that a Russian oligarch has developed a "free energy" machine based on the lost work of Nikola Tesla. There, he is forced to finish developing the earthshaking invention. If perfected, the machine will provide unlimited, pollution-free electrical energy extracted from the earth's very atmosphere. In so doing, it would make the oil, gas and alternative energy industries

obsolete. It could also solve the world's problems with poverty and perhaps even climate change. Torn between his scientific ego and the fact that people driven by profit alone are in control of technology that has such monumental humanitarian potential, the professor reluctantly begins to help with the project. Working side-by-side with him is a beautiful woman from Tajikistan who has special knowledge related to the device's operation and is also being held against her will. The professor soon develops feelings for her, and they both try to escape, which takes them on a harrowing chase through Moscow. The two are relentlessly pursued not only by the Russian oligarch and his henchmen, but by an oil industry cartel who will stop at nothing to keep the disruptive technology hidden from the world. Readers of Dan Brown, Michael Crichton, Robert Ludlum, Blake Crouch, and Nelson DeMille will enjoy this exciting, well-researched techno-thriller.

russian website for textbooks: SHAN HAI JING—A BOOK COVERED WITH BLOOD Kate Bazilevsky, 2014-08-22 In essence, this story is about how a certain person was searching his bookshelf for something to read and in the end found a book, which turned out to be the source, from which it is possible to obtain absolutely any kind of information about absolutely any person. Meaning, information to the smallest particulars and details about what his or her qualities of personality are, how he or she lives, what he or she really wants to achieve, what he or she hides, and much more. And, it does not matter, if the subject is some person, who lived in the distant past or lives in the present or someone, who will live in the future. Since, as it turned out later on, this literary monument is nothing other than the Catalog of human population. In other words, the encyclopedia of Homo sapiens; in essence, the same as encyclopedias, reference books for specialists, which contain complete information about representatives of a particular subspecies of animals, plants, etc. Although at some point, the course of this story turned banal: bad guys from security services, intelligence services, politics decided to not only use this source of knowledge for their dirty deeds, but also to appropriate it solely for their personal use. And, the way they tried to do this is also banal: by physically destroying the author of discovery of the Catalog of human population and all of his colleagues. However, the ending of this story makes it stand out from the category of ordinary spy stories. At least because the main characters of this story managed to survive not due to favorable concatenation of circumstances or someone's help, but thanks to that knowledge, which they discovered in the ancient text, which turned out to be the Catalog of human population. Of course, such an outcome upset and continues to upset not only the Russian special services, but also all those people in whose way developers of the Catalog of human population got. And, in this civilization, there are countless numbers of such people: from psychologists (who become no longer needed by anyone) to organizers of this civilization themselves. Since from the standpoint of the Catalog of human population—technogenic civilization without a human, which they lovingly built for many centuries, is simply trash, to put it mildly, and beneath all criticism. And, they themselves are also trash. However, regular people, who (thanks to the scientific discovery made by Andrey Davydov) got the source with answers to all of their questions and individual recipes, now no longer need to pay experts on the human soul for being shamelessly fooled. Therefore, whoever tries to kill developers of the Catalog of human population in the future must know that it is no longer possible, as they already became part of history of humanity. After all, at the current stage of development, a Homo sapiens has only one possibility to continue to live after death, to live through the ages: in the product that he/she created. And, those, who tried and continue to try to kill them, were nobodies and will remain nobodies, who one day will cease to exist without leaving a trace. As for organizers of this civilization—maybe instead of trying to find new recipes to destroy excess billions and trying to examine human potential using Neanderthal methods, it would be more reasonable not only to find out the recipe of how to make Homo sapiens a 100% controllable producer and consumer from the source (which, by the way, seems to have been left to humanity by creators of nature and a human on this planet), but also how to build a civilization without quotes? After all, it only seems to them that they are the main deceivers, while in reality they were fooled, and fooled majorly.

russian website for textbooks: Is International Law International? Anthea Roberts,

2017-09-18 This book takes the reader on a sweeping tour of the international legal field to reveal some of the patterns of difference, dominance, and disruption that belie international law's claim to universality. Pulling back the curtain on the divisible college of international lawyers, Anthea Roberts shows how international lawyers in different states, regions, and geopolitical groupings are often subject to distinct incoming influences and outgoing spheres of influence in ways that reflect and reinforce differences in how they understand and approach international law. These divisions manifest themselves in contemporary controversies, such as debates about Crimea and the South China Sea. Not all approaches to international law are created equal, however. Using case studies and visual representations, the author demonstrates how actors and materials from some states and groups have come to dominate certain transnational flows and forums in ways that make them disproportionately influential in constructing the international. This point holds true for Western actors, materials, and approaches in general, and for Anglo-American (and sometimes French) ones in particular. However, these patterns are set for disruption. As the world moves past an era of Western dominance and toward greater multipolarity, it is imperative for international lawyers to understand the perspectives and approaches of those coming from diverse backgrounds. By taking readers on a comparative tour of different international law academies and textbooks, the author encourages them to see the world through the eyes of others -- an essential skill in this fast changing world of shifting power dynamics and rising nationalism.

russian website for textbooks: *The Judicial System of Russia* Kathryn Hendley, Peter H. Solomon Jr., 2023-11-24 The Judicial System of Russia paints a portrait of the courts of the Russian Federation under Putin, how they work in practice, and what shapes the behaviour of its judges. It stresses the dual nature of a judicial system, where ordinary cases are for the most part handled fairly, but where cases of interest to powerful persons are subject to influence--a common situation in authoritarian states. In so doing, the authors trace the origins of some contemporary practices to the Soviet past, but also identify novelties. They pay close attention to the struggles of reformers to make the courts fairer and more efficient, along with the measures taken to ensure that judges conform to the expectations of their political masters. This means dealing with the evolution of judicial governance, including the selection, promotion, and disciplining of judges. In studying the actual operation of the courts, the authors take a socio-legal approach, emphasizing how different players (petitioners, respondents, lawyers, prosecutors, accused, judges) behave and why. This means dealing with the full gamut of courts from justices of the peace through the Supreme and Constitutional Courts and analysing their conduct in ordinary civil disputes, criminal cases, business disputes, administrative justice (claims against state officials), and constitutional matters. The authors also examine the relation of the public to the courts, including its readiness to litigate disputes despite generally negative views of the courts. This analysis of the administration of justice in Russia covers both the Constitutional Amendments of 2020 and developments relating to the first months of the 2022 War in Ukraine. It is a must read for academics, practitioners, and all those with an interest in comparative courts and Russia's judicial system.
