teaching textbooks grade 2: Understanding Multimodal Discourses in English Language Teaching Textbooks Christopher A. Smith, 2022-08-11 Textbooks are indispensable components and in some case the cornerstones of the mission of English Language Teaching (ELT). However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective; one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions and reifications. The triangulated approach, demonstrated in a series of vignettes featuring Korean university students and native-English-speaking instructors, can inform textbook choice, instigate change, and inspire lesson re-contextualization to best suit the needs of its primary consumers.

teaching textbooks grade 2: The Learning and Teaching of Phonological Decoding in Chinese EFL Children Keren Hua, 2024-08-30 This book presents the learning and teaching of phonological decoding in Chinese EFL primary classrooms. The phonological decoding ability of the children is described, interpreted, and evaluated, the teaching materials are analyzed and the classroom instruction observed, and the links between these various facets are explored using both quantitative and qualitative techniques (textbook analysis, classroom observations, interviews with teachers and a textbook writer, reading test and nonword reading test). This book provides insights into Chinese children's phonological decoding profile, including performance in decoding different types of orthographic units, the strategies children at different levels of reading ability use to sound out vowel graphemes, and their decoding ability in relation to reading ability. The investigation of the teaching practices reveals how the decoding instruction is designed, developed, and delivered to the children and thereby informs the interplay between the classroom instruction and children's development of phonological decoding skills.

teaching textbooks grade 2: *Chinese Schooling and Free-Spirit Education* Wei Yu,

2023-08-07 Reaching deep into the wealth of Chinese philosophical wisdom, this book offers rich insights into a way of educating that has found staunch advocates among educators through the ages. The 'free-spirit education', which calls on educators to respect and nurture the natural goodness of each child, affords an educational principle that is embedded in one of the most important Confucian classics: The Doctrine of the Mean. This book analyzes the meaning, history, principles, and educational application of 'free-spirit education' and also explores its contemporary development in the context of a school improvement initiative. It introduces the intellectual origins of 'free-spirit education', the application in 'process-based inductive teaching' and cases from the field. It presents the collection of pedagogical cases that are rooted in the traditions of Chinese philosophic inquiry and viewed through the lens of contemporary pedagogy for human development. This book is a useful reference for university faculty, educational researchers, school teachers and leaders, graduate and undergraduate students in curriculum studies and in philosophy, social science, and education, curriculum developers, and all those educators who are interested in understanding 'free-spirit education'—a key component of the humanistic traditions of Chinese education.

teaching textbooks grade 2: Educating Marginalized Communities in East and Southeast Asia Khun Eng Kuah, Jason Eng Thye Tan, 2016-11-25 Despite the enshrinement by the United Nations in 1948 of education as a universal human right, and despite the ideals espoused in the Education for All declaration in Dakar in 1990, it is patently clear that these ideals remain far from realized for a substantial portion of humankind. Especially at risk are vulnerable segments of society such as women, migrants, refugees, rural populations, ethnic minorities, and the financially disadvantaged. This book centres on efforts to provide education to these marginalized populations in the East and Southeast Asian region. Of particular interest are questions of financing and control. As various governments have struggled to manage the escalating costs of building schools, training teachers and educating students, the topic of public private partnerships in educational provision has assumed growing importance. The seven chapters presented here highlight a variety of partnerships among state, civil society and non-government organisations (NGOs).

teaching textbooks grade 2: Realising Learning Keith Wood, Saratha Sithamparam, 2014-07-25 The best professional development for teachers focuses on issues they encounter in the classroom. It is collaborative, school-based, learning-focused and supports teachers in solving problems of pedagogy in context. Through lesson study teachers are empowered to make decisions to improve pedagogy, curriculum and assessment based on evidence of the effect of design on learning. Being explicit about the theories of learning underpinning their teaching decisions allows teachers to develop a shared vocabulary for the diagnosis of learning problems, redesign and evaluation of learning situations. Learning study introduces a new Variation Theory of Learning. It provides a framework for teachers to make critical decisions about what is to be learnt and how. The fusion of lesson and learning study is changing the nature of professional development and providing teachers with a voice in the field of educational research. In Realising Learning, teachers, teacher educators and policy makers can share the progress achieved by teachers in Asia and Europe to improve teaching and learning.

teaching textbooks grade 2: Teaching India-Pakistan Relations Kusha Anand, 2023-02-06 The rivalry between India and Pakistan began on British withdrawal from the British Indian Empire in 1947, and with the sudden partition of India immediately afterwards. It has proven remarkably resilient. While the countries share a long history and have considerable social-cultural affinity, relations since Partition have been marked by three wars, constant border skirmishes and a deep distrust that permeates both societies. In each, teaching about those relations is weighted with political and cultural significance, and research shows that curriculums have been used to shape the mindset of new generations with regard to their neighbouring state. This book explores the attitudes and pedagogical decision-making of teachers in India and Pakistan when teaching India-Pakistan relations. Situating teachers in the context of reformed textbooks and curriculums in both countries that explicitly advocate critical thinking and social cohesion, Kusha Anand explores how far teachers

have enacted these changes in their classrooms. Based on data collected from teachers via semi-structured interviews and classroom observations in India and Pakistan she argues that, despite whole-nation policies and texts, teaching of India-Pakistan relations is dependent on the socio-economic status of schools. While there is progress towards the stated goals, teachers in both countries face pressures from the interests of school and state, and often miss opportunities to engage with multiple perspectives and stereotypes in their classrooms.
