teaching textbooks 3rd grade: *Understanding Multimodal Discourses in English Language Teaching Textbooks* Christopher A. Smith, 2022-08-11 Textbooks are indispensable components and in some case the cornerstones of the mission of English Language Teaching (ELT). However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective; one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions and reifications. The triangulated approach, demonstrated in a series of vignettes featuring Korean university students and native-English-speaking instructors, can inform textbook choice, instigate change, and inspire lesson re-contextualization to best suit the needs of its primary consumers.

teaching textbooks 3rd grade: Silencing Refugees' Voices in Educational Practices Menşure Alkiş Küçükaydın, Hakan Ulum, Ömer Gökhan Ulum, 2024-11-11 This book foregrounds silenced voices by correlating refugee experiences with educational practices, while questioning how we address the educational rights of individuals affected by conflicts and wars. Accordingly, the book presents a novel perspective within the field of education. Within the context of the most prevalent educational instruments, textbooks, this work endeavors to highlight the muted perspectives of immigrants in education and make significant advances towards resolving this problem. The book not only addresses an educational dilemma, but also emphasizes humanity's shared responsibility. Supporting the educational rights of refugees promotes not only their personal growth, but also more tolerant, compassionate, and sustainable societies. At the same time, this work promotes a critical comprehension of refugee experiences in education by presenting both problems and solutions to the readership. In this way, it demonstrates how a more equitable and egalitarian approach to education can be adopted and it ultimately encourages readers to adopt a broader perspective on the world, embracing humanitarian values and social responsibility.
