religion class textbooks: Teaching Critical Religious Studies Jenna Gray-Hildenbrand, Beverley McGuire, Hussein Rashid, 2022-08-11 Are you teaching religious studies in the best way possible? Do you inadvertently offer simplistic understandings of religion to undergraduate students, only to then unpick them at advanced levels? This book presents case studies of teaching methods that integrate student learning, classroom experiences, and disciplinary critiques. It shows how critiques of the scholarship of religious studies-including but not limited to the World Religions paradigm, Christian normativity, Orientalism, colonialism, race, gender, sexuality, and class-can be effectively integrated into all courses, especially at an introductory level. Integrating advanced critiques from religious studies into actual pedagogical practices, this book offers ways for scholars to rethink their courses to be more reflective of the state of the field. The book leads you through the description, analysis, and interpretation of examples from multiple historical periods, cultures, and religious traditions, including primary source material such as Matthew 6:9-13 (the Lord's Prayer), the gohonzon scroll of the Japanese new religion Soka Gakkai, and the pilgrimage to Mecca (hajj). religion class textbooks: The Performance of Religion Cia Sautter, 2017-01-12 The performing arts are uniquely capable of translating a vision of an ideal or sacred reality into lived practice, allowing an audience to confront deeply held values and beliefs as they observe a performance. However, there is often a reluctance to approach distinctly religious topics from a performance studies perspective. This book addresses this issue by exploring how religious values are acted out and reflected on in classic Western theatre, with a particular emphasis on the plays put on during the Globe Theatre's yearlong season of 'Shakespeare and the Bible'. Looking at plays such as *Much Ado About Nothing*, *Dr. Faustus* and *Macbeth*, each chapter includes ethnographic overviews of the performance of these plays as well as historical and theological perspectives on the issues they address. The author also utilizes scholarship from other academics, such as Paul Tillich and Martin Buber, in examining the relationship between art and culture. This helps readers of this book to look at religion in culture, and raise questions and explore ideas about how people appraise their religious values through an encounter with a performance. *The Performance of Religion: Seeing the sacred in the theatre* treads new ground in bringing performance and religious studies

scholarship into direct conversation with one another. As such, it is essential reading for any academic with an interest in theology, religion and ethics and their expression in culture through the performing arts.

religion class textbooks: A Textbook of Legal Studies for Class XII Kirthana Singh Khurana, Surendra Pal Singh, Goyal Brothers Prakashan, 2021-07-01 A Textbook of Legal Studies for Class XII In the last few decades, India has not only showcased itself as the world's largest democracy but also exhibited the resilience of its institutions and the fortitude of its governance benchmarks. As India pursues a leadership position in the world community, the need for a rule-of-law society has become a necessary pre-condition. A compliant and law-abiding citizenry alone can build the requisite ecosystem for a nation to surge ahead. This calls for a greater legal literacy amongst its masses to enhance their understanding of public affairs as well their entitlements and duties as citizens. In the long run, this can also potentially eradicate the ethics deficit in society. Structured training in law not only helps the youth challenge their thought process and nurture analytical and negotiation skills but also prepares them for myriad opportunities and exciting career options. No wonder, in the last few years, apart from offering the traditional career in litigation, the law has established itself into fields like public service, academics, research, public policy, journalism, and various other emerging streams. To cater to this burgeoning demand for trained legal professionals, India has seen a tremendous growth of institutions like the National Law Universities and many private universities offering law courses, in addition to the expansion of the existing facilities. Central Board of Secondary Education's decision to introduce 'Legal Studies' as an elective subject, in the year 2013-14 for the Class XI students and in the year 2014-15 for the Class XII students, could not have come at a better time. It is a testimony to the realisation that the introduction of an important subject like Legal Studies at an early stage can do wonders for the students who plan a career in the field of law. Even for those who may pursue other careers, their intellectual strength and the problem-solving abilities will be enhanced through the study of law. This book is a humble attempt to make a student's first interface with the law as a subject an elevating experience. Care has been taken to make the presentation of the text simple and reader-friendly. The various units of the book, while meeting the requirements of the prescribed syllabus, offer comprehensive coverage of the aspects of law that have been covered. Important legal terms have been meticulously explained with examples to help the students develop a clear understanding about them. All relevant cases have been duly cited, and it has been ensured that the text comprises the latest information about the incorporated content. PREFACE Authors are confident that the book shall be extremely useful for the students of Class XII in developing a clear understanding of the various critical facets of law. They can also benefit immensely from the tips given by the authors for preparing for the examinations and scoring well. The book also has the potential to become a foundational text in the hands of those seeking a basic understanding of the Indian legal system. Our sincere thanks to Dr. B.L. Babel, retired District and Sessions Judge and an acclaimed author of innumerable law books, and Dr. Anil Kaushik, former Dean, Faculty of Law, M.G.S. University, Bikaner, and presently, Principal, S.D. Law (P.G.) College, Sri Ganganagar, Rajasthan, for guiding us in the development of the text. Special thanks to Mr. Sanjay Sardana and Mr. Sankalp Sardana of the Manav Mangal Group of Schools for helping us develop a perspective about the students' expectations from the book. We would like to express our deep gratitude to Prof. Ramesh Arora and Mrs. Priyanka Sapra for their mentoring and consistent motivation in all our endeavours. We are deeply indebted to the publishers, Goyal Brothers Prakashan, particularly Mr. Suresh Goyal and his dedicated team for making this book a reality despite all the impediments posed by the pandemic. Their efforts in enhancing the presentation of the book are sincerely acknowledged. The authors shall also like to register their profound appreciation for the outstanding academic and research environment at the O.P. Jindal Global University, Sonapat, which helped in the conception and development of this book. In particular, the suggestions from a few students turned out to be invaluable in the development of this work, for which the authors shall remain indebted. Human efforts, howsoever ingenuous, are at best attempts seeking excellence and are liable to suffer from

infirmities. We look forward to the feedback from our readers and shall be ever so keen to learn from their views and acknowledge the same appropriately. Last but by no reckoning the least, the authors would like to thank all their friends and family members profusely for their encouragement and constant support.

Hunt, 2009-03-05 Ten Commandments displays, prayer at football games, Bible in the curriculum, vouchers for tuition at religious schools, Pledge of Allegiance, wall of separation between church and state, among other hot button issues at the intersection of religion and education, generate a great deal of heat, but often light is sorely lacking. religion class textbooks: Religion and the Book Trade Caroline Archer, Lisa Peters, 2015-09-18 This volume brings together a selection of the papers presented at the "Print Networks" conference at the National Library of Wales, Aberystwyth, in July 2011. The conference theme, "Religion and the book trade", was chosen to mark the four-hundredth anniversary of the publication of the King James Bible. Numerous events throughout the United Kingdom and the English-speaking world took place to commemorate this historic event, the Print Networks conference being one of many. Religious books - be they tracts, sermons, homilies, hymn books, or Bibles - were primarily used by all denominations to spread their version of Christianity, to attract people to their cause, and to retain the loyalty of supporters. But these publications are also credited with the survival of indigenous languages, and, naturally, the printers and distributors of these religious works were crucial to the process of spreading both religion and literacy among the population. The contributions to this book cover a wide gamut of religion and the book trade from the sixteenth to the twentieth centuries. Most of the chapters are concerned with the European book trade and concentrate on Christian religions and cover both Catholic and Protestant, particularly Nonconformist/Dissenter, experiences. Most of the chapters relate to the British and Irish book trade, but there are also contributions discussing Italy and the Netherlands. There are chapters relating to the printers and publishers of religious works; authorship; the issue and production of religious periodicals; the promoters of religious libraries; and clandestine elements of the trade. This volume emphasises the pivotal role played by those in the book trade - printers, publishers or booksellers - in the distribution of religious works, and demonstrates that spreading the ideas of their authors, creators, or translators would have been far more difficult without their involvement. This book will be of interest to academics, independent scholars, heritage professionals and research students in the fields of book trade history; book arts; bibliography; bookbinding; printing and

typographic history; publishing; social and industrial history; and religious history.

religion class textbooks: Nonreligion in Late Modern Societies Anne-Laure Zwillling, Helge Årsheim, 2022-06-14 This volume presents results from new and ongoing research efforts into the role of nonreligion in education, politics, law and society from a variety of different countries. Featuring data from a wide range of quantitative and qualitative studies, the book exposes the relational dynamics of religion and nonreligion. Firstly, it highlights the extent to which nonreligion is defined and understood by legal and institutional actors on the basis of religions, and often replicates the organisation of society and majority religions. At the same time, it displays how essential it is to approach nonreligion on its own, by freeing oneself from the frameworks from which religion is thought. The book addresses pressing questions such as: How can nonreligion be defined, and how can the “nones” be grasped and taken into account in studies on religion? How does the sociocultural and religious backdrop of different countries affect the regulation and representation of nonreligion in law and policymaking? Where and how do nonreligious individuals and collectives fit into institutions in contemporary societies? How does nonreligion affect notions of citizenship and national belonging? Despite growing scholarly interest in the increasing number of people without religion, the role of nonreligion in legal and institutional settings is still largely unexplored. This volume helps fill the gap, and will be of interest to students, researchers, policymakers and others seeking deeper understanding of the changing role of nonreligion in modern societies.

religion class textbooks: The Oxford Handbook of Religion and Education Liam Francis Gearon, Arniika Kuusisto, 2025-04-29 The Oxford Handbook of Religion and Education offers a multi-disciplinary work of scholarship and research highlighting the global significance of a critical interface of cultural and social, political, and theological importance. Drawing on historical perspective and contemporary reflection, the collection provides a uniquely transformative analysis of why the interface of religion and education is of such critical significance. With contributions from some of the leading thinkers in the field, this Handbook presents a cumulatively powerful argument to reassess the complexities of the intersection of religion and education. With ambitious and yet accessible intellectual engagements, the Handbook here furthers a central thesis: that the interface of religion and education is not merely a matter of arcane disputation about a domain of ancient origin or a rudimentary matter of formal educational process, but a vibrant domain of critical contestation fundamental to knowing, understanding, and living in the modern world.

religion class textbooks: Negotiating Democracy and Religious Pluralism Karen Barkey, Sudipta Kaviraj, Vatsal Naresh, 2021 A collection of essays that situates and furthers contemporary debates around the prospects of democracy in diverse societies within and beyond the West. *Negotiating Democracy and Religious Pluralism* examines the relationship between the functioning of democracy and the prior existence of religious plurality in three societies outside the West: India, Pakistan, and Turkey. All three societies had on one hand deep religious diversity and on the other long histories as imperial states that responded to religious diversity through their specific pre-modern imperial institutions. Each country has followed a unique historical trajectory with regard to crafting democratic institutions to deal with such extreme diversity. The volume focuses on three core themes: historical trends before the modern state's emergence that had lasting effects; the genealogies of both the state and religion in politics and law; and the problem of violence toward and domination over religious out-groups. Volume editors Karen Barkey, Sudipta Kaviraj, and Vatsal Naresh have gathered a group of leading scholars across political science, sociology, history, and law to examine this multifaceted topic. Together, they illuminate various trajectories of political thought, state policy, and the exercise of social power during and following a transition to democracy. Just as importantly, they ask us to reflexively examine the political categories and models that shape our understanding of what has unfolded in South Asia and Turkey.

religion class textbooks: There is a Crack in Everything—Education and Religion in a Secular Age K. H. (Ina) ter Avest, 2019-11-22 There are two constants in academic and theological discourse

throughout history, they are the debate around secularization and the dialogue concerning the intersection of religion and education. Each age has had its debate about modernizing forces that drive concerns of impending secularization. In this publication this theme is approached from perspectives of teachers, of students, of policy makers and situated in a politico-historical context. Aware of the fact that in today's plural societies one sacred canopy is non-existent anymore, cracks of the sacred canopy/canopies are described, as well as 'the light that gets in', the possible and challenging ways out are roughly sketched.

religion class textbooks: New Voices in Greek Orthodox Thought Trine Stauning Willert, 2016-05-13 New Voices in Greek Orthodox Thought brings to the light and discusses a strand in contemporary Greek public debate that is often overlooked, namely progressive religious actors of a western orientation. International - and Greek - media tend to focus on the extreme views and to categorise positions in the public debate along well known dichotomies such as traditionalists vs. modernisers. Demonstrating that in late modernity, parallel to rising nationalisms, there is a shift towards religious communities becoming the central axis for cultural organization and progressive thinking, the book presents Greece as a case study based on empirical field data from contemporary theology and religious education, and makes a unique contribution to ongoing debates about the public role of religion in contemporary Europe.
