textbooks tarleton: *The Complete Works* George Bernard Shaw, 2022-05-17 George Bernard Shaw's 'The Complete Works' is a monumental compilation that encapsulates the breadth of his creative genius, spanning plays, essays, and letters. The collection is marked by Shaw's distinctive wit and incisive social critique, reflecting the Victorian and Edwardian eras. His writing style blends sharp dialogue with profound philosophical inquiries, often challenging societal norms and contemplating the themes of class, gender, and morality through his characters. This anthology not only serves as a testament to Shaw's theatrical innovations, such as his use of realistic dialogue and satire, but also situates his works within the larger context of modernist literature. Born in 1856 in Dublin, Shaw's upbringing in a tumultuous socio-political environment profoundly influenced his worldview. His experiences in the Fabian Society honed his beliefs in socialism and reform, which later permeated his writing, particularly in plays like 'Pygmalion' and 'Saint Joan.' This collection showcases the evolution of his thought, revealing how Shaw aimed to provoke, challenge, and

inspire dialogue among readers and audiences alike. 'The Complete Works' is an essential volume for scholars, theater enthusiasts, and anyone interested in the complexities of human nature and societal structures. Shaw's compelling narratives and sharp-edged humor ensure that readers will find both entertainment and enlightenment, making this collection a vital addition to any literary library.

textbooks tarleton: The First U.S. History Textbooks Barry Joyce, 2015-08-27 This book analyzes the common narrative residing in American History textbooks published in the first half of the 19th century. That story, what the author identifies as the American “creation” or “origins” narrative, is simultaneously examined as both historic and “mythic” in composition. It offers a fresh, multidisciplinary perspective on an enduring aspect of these works. The book begins with a provocative thesis that proposes the importance of the relationship between myth and history in the creation of America’s textbook narrative. It ends with a passionate call for a truly inclusive story of who Americans are and what Americans aspire to become. The book is organized into three related sections. The first section provides the context for the emergence of American History textbooks. It analyzes the structure and utility of these school histories within the context of antebellum American society and educational practices. The second section is the heart of the book. It recounts and scrutinizes the textbook narrative as it tells the story of America’s emergence from “prehistory” through the American Revolution—the origins story of America. This section identifies the recurring themes and images that together constitute what early educators conceived as a unified cultural narrative. Section three examines the sectional bifurcation and eventual re-unification of the American History textbook narrative from the 1850s into the early 20th century. The book concludes by revisiting the relationship between textbooks, the American story, and mythic narratives in light of current debates and controversies over textbooks, American history curriculum and a common American narrative.

textbooks tarleton: Textbooks on Israel-Palestine Seyed Hadi Borhani, 2022-01-27 How is the Israel/Palestine question narrated in Western academia? What ideas dominate the key textbooks on the subject and what is presented as 'truth'? This book answers these critical questions. It is widely known that Western support of Israel played a vital role in the realization of Zionist objectives in Palestine. But academic support of Israel in the West has been a neglected issue, with Western academic knowledge being regarded as impartial and objective. This book reveals that this understanding of Western academic knowledge is wrong when it comes to the Israel/Palestine question. Rather, knowledge has been biased, misleading, and dogmatic and Western college students are subscribing to 'factual histories' based on theories at best, if not fiction. The book is the first empirical investigation able to document this partial reporting of history. Seyed Hadi Borhani examines the most popular college-level textbooks used to teach the history of the Israel/Palestine in Western universities, combining 'textbook analysis' (to determine how the dominant academic texts report the question) and a 'context analysis' (to identify who 'manufactures' the dominant knowledge). The book provides a historical map of how the Israel-Palestine conflict is understood in the West. The book can be used as a critique for students and professors to use alongside textbooks and is a vital and much-needed intervention into the state of affairs in Western academia.

textbooks tarleton: *Hush* Mack Hagood, 2019-02-14 For almost sixty years, media technologies have promised users the ability to create sonic safe spaces for themselves—from bedside white noise machines to Beats by Dre's "Hear What You Want" ad campaign, in which Colin

Kaepernick's headphones protect him from taunting crowds. In *Hush*, Mack Hagood draws evidence from noise-canceling headphones, tinnitus maskers, LPs that play ocean sounds, nature-sound mobile apps, and in-ear smart technologies to argue the true purpose of media is not information transmission, but rather the control of how we engage our environment. These devices, which Hagood calls orphic media, give users the freedom to remain unaffected in the changeable and distracting spaces of contemporary capitalism and reveal how racial, gendered, ableist, and class ideologies shape our desire to block unwanted sounds. In a noisy world of haters, trolls, and information overload, guarded listening can be a necessity for self-care, but Hagood argues our efforts to shield ourselves can also decrease our tolerance for sonic and social difference. Challenging our self-defeating attempts to be free of one another, he rethinks media theory, sound studies, and the very definition of media.
