u of u textbooks: Textbooks in Academic Libraries Chris Diaz, 2018-12-03 Shortly after the syllabi are posted, and long before the beginning of the term, interlibrary loan departments at academic libraries will have filled or rejected innumerable textbook requests. While it would be unwise if not impossible to buy and circulate every textbook at a college or university, there are many academic libraries who are selectively adding textbooks to their collections. And the practice seems to be gaining momentum. In this volume, the Association for Library Collections and Technical Services (ALCTS) and editor Chris Diaz gather case studies that pull together creative approaches and best practices for print textbook reserve programs. This book discusses such topics as results and analysis from a detailed survey of a state university's core-course textbook reserve program; funding sources for starting or piloting a program; using aggregated enrollment, grade, and textbook cost data to identify high impact courses; identifying course-related books that are in the library's collection or fit an existing collection policy; workflow for using bookstore data with ILS and purchasing systems; and using LibGuides and Google Sheets to publicize textbook holdings, and how a back-end database supports discovery for students and reporting for reserves staff. A textbook reserve program can be one way of helping students who are struggling with the high cost of textbooks, and this book spotlights a variety of examples that can be used as models.

u of u textbooks: Ideology and Hegemony of English Foreign Language Textbooks Ömer Gökhan Ulum, Dinçay Köksal, 2020-01-27 This volume investigates ideological and hegemonic practices in globally and locally written English as a Foreign Language (EFL) textbooks, and explores whether these textbooks reflect the values, beliefs and norms of the native-speaker society by examining their ideological components and the hegemonic practices by means of which the source society or state seeks to influence learners of the language. It also attempts to clarify EFL teachers' and students' views on the underlying ideology and hegemonic practices in globally and locally written EFL textbooks. Studies on the relationship between ideology, hegemony and textbooks in applied linguistics have become more prevalent in recent decades, as the emergence of

critical theory, critical pedagogy, and critical thinking skills from the 1920s onwards has led scholars to adopt a more critical perspective towards EFL textbooks, especially with regard to elements of ideology and hegemony. These two terms encompass a plethora of components, ranging from nationalism to religion. At the same time, the importance of metanarratives originating from the tenets of modernism has declined from the 1960s onwards, the assumption being that the world has entered a new age called postmodernism and post-structuralism that emphasizes the role of individuals and rejects efforts to reinforce post-colonialism, the effects of which can be seen in EFL textbooks. Accordingly, taking the elements of ideology and hegemony into account remains a vital aspect in the analysis of EFL textbooks.

Creating or expanding an e-book collection is a complicated challenge. In addition to facing the same challenges a librarian would face in developing a print collection, librarians developing an e-book collection also face a host of unprecedented legal, technological, and vendor challenges. This issue of Library Technology Reports will examine these challenges, focusing on strategies for purchasing e-books in a consortium, working with vendors, implementing e-reader programs in an academic environment, and purchasing electronic textbooks. Although the challenges are significant, this issue will show how they can be overcome and how the effort it takes to develop an e-book collection is well worth the effort.

u of u textbooks: The Economics Anti-Textbook Rod Hill, Professor Tony Myatt, 2010-03-11 Mainstream textbooks present economics as an objective science free from value judgements; that settles disputes by testing hypotheses; that applies a pre-determined body of principles; and contains policy prescriptions supported by a consensus of professional opinion. The Economics Anti-Textbook argues that this is a myth - one which is not only dangerously misleading but also bland and boring. It challenges the mainstream textbooks' assumptions, arguments, models and evidence. It puts the controversy and excitement back into economics to reveal a fascinating and a vibrant field of study - one which is more an 'art of persuasion' than it is a science. The Economics Anti-Textbook's chapters parallel the major topics in the typical text, beginning with a boiled-down account of them before presenting an analysis and critique. Drawing on the work of leading

economists, the Anti-Textbook lays bare the blind spots in the texts and their sins of omission and commission. It shows where hidden value judgements are made and when contrary evidence is ignored. It shows the claims made without any evidence and the alternative theories that aren't mentioned. It shows the importance of power, social context and legal framework. The Economics Anti-Textbook is the students' guide to decoding the textbooks and shows how real economics is much more interesting than most economists are willing to let on.

Gale, 1999-04-23 An exploration of the sometimes tenuous relationship between textbooks and the discipline of composition and rhetoric, (Re)Visioning Composition Textbooks critically scrutinizes the culture of textbooks from the vantage point of scholars and teachers. It examines a variety of textbooks including: standard rhetorics, handbooks, cross-cultural anthologies, readers, technical textbooks, and argumentation textbooks. Different perspectives are used to discuss the cultures, ideologies, traditions, and the material and political conditions that influence the writing and publishing of these works. Contributors raise challenging questions about the relationship between textbooks and the cultures which produce them, the discipline of which they are an indispensable part, and the classrooms in which they are to have their most tangible effects on teaching and learning.

u of u textbooks: Representations of the World in Language Textbooks Karen Risager, 2018-01-08 This book presents a new and comprehensive framework for the analysis of representations of culture, society and the world in textbooks for foreign and second language learning. The framework is transferable to other kinds of learning materials and to other subjects. The framework distinguishes between five approaches: national studies, citizenship education studies, cultural studies, postcolonial studies and transnational studies. In a series of concrete analyses, the book illustrates how one can describe and uncover representations of the world in textbooks for English, German, French, Spanish, Danish and Esperanto. Each analysis is accompanied by suggestions of possible supplements and changes. The book points to the need for language learning materials to deal seriously with knowledge about the world, including its diversities and problems.
