

ukrainian textbooks

ukrainian textbooks play a vital role in the educational landscape of Ukraine. These resources not only provide essential knowledge but also reflect the country's culture, history, and language. With the ongoing changes in the educational system and the influence of modern technology, Ukrainian textbooks have evolved significantly, adapting to new teaching methodologies and digital formats. This article will delve into the different types of Ukrainian textbooks, their relevance in the curriculum, the challenges faced in their production, and the future of educational materials in Ukraine. By exploring these aspects, we aim to provide a comprehensive overview of the significance of Ukrainian textbooks in contemporary education.

- Types of Ukrainian Textbooks
- The Role of Ukrainian Textbooks in Education
- Challenges in Textbook Production
- The Future of Ukrainian Textbooks
- Conclusion

Understanding Ukrainian Textbooks

Ukrainian textbooks are essential resources that cater to various educational levels, from primary schools to universities. They are designed to help students grasp complex subjects while promoting the Ukrainian language and culture. Textbooks are not merely instructional materials; they are a reflection of national educational standards and ideologies. The development of these textbooks integrates input from educators, researchers, and policymakers, ensuring that they meet the needs of students and align with the goals of the educational system.

The significance of Ukrainian textbooks goes beyond mere content delivery; they serve as tools for cultural preservation and identity formation. By including historical narratives, literary works, and scientific knowledge in the Ukrainian language, these textbooks contribute to a unified national identity. Furthermore, they help students appreciate their heritage and instill a sense of pride in their cultural background.

Types of Ukrainian Textbooks

Ukrainian textbooks can be categorized based on educational levels, subjects, and formats. Understanding these categories helps educators, students, and parents choose the right resources for effective learning.

By Educational Level

Ukrainian textbooks are produced for various educational levels, including:

- **Primary Education:** Textbooks for young learners typically cover subjects such as Ukrainian language, mathematics, natural sciences, and social studies.
- **Secondary Education:** These textbooks expand on subjects introduced in primary education and include specialized topics like foreign languages, physics, chemistry, and history.
- **Tertiary Education:** At the university level, textbooks are more advanced and cover specialized disciplines, often including research methodologies and theoretical frameworks.

By Subject

In addition to categorization by educational level, textbooks are also organized by subject matter. Common subjects include:

- **Humanities:** These textbooks include literature, history, and philosophy.
- **Sciences:** Textbooks covering mathematics, biology, chemistry, and physics.
- **Social Sciences:** Resources on sociology, political science, and economics.
- **Foreign Languages:** Ukrainians learn various foreign languages, and textbooks are tailored for each language.

By Format

The format of Ukrainian textbooks has also evolved, with traditional printed books being complemented by digital versions. Digital textbooks offer interactive elements, allowing for a more engaging learning experience. This shift towards digital formats is particularly relevant in today's educational

landscape, where technology plays a crucial role in teaching and learning.

The Role of Ukrainian Textbooks in Education

Ukrainian textbooks serve multiple roles in the educational process. They are central to curriculum implementation, providing structured content that guides teachers and students alike. Textbooks offer a systematic approach to learning, ensuring that all essential topics are covered comprehensively.

Furthermore, textbooks aid in standardizing education across the country. By adhering to national educational standards, they ensure that students receive a consistent quality of education, regardless of their geographic location. This uniformity is crucial for fostering equality in educational opportunities.

In addition to serving educational purposes, Ukrainian textbooks also promote critical thinking and creativity. Many modern textbooks incorporate problem-solving activities, project-based learning tasks, and interdisciplinary approaches that encourage students to think critically and apply their knowledge in real-world situations.

Challenges in Textbook Production

The production of Ukrainian textbooks is not without its challenges. Several factors hinder the effective development and distribution of quality educational materials.

Funding and Resources

One of the primary challenges is the lack of adequate funding for educational resources. Many schools, especially in rural areas, struggle to obtain sufficient funds to purchase new textbooks or update existing materials. This financial constraint can lead to outdated resources being used in classrooms.

Quality Control and Relevance

Ensuring the quality and relevance of textbooks is another significant challenge. The rapid evolution of knowledge and teaching methodologies requires constant updates to educational materials. However, the lengthy approval process for new textbooks can result in delays, leaving educators with outdated information.

Digital Transition

The transition from print to digital formats has also posed challenges. While digital textbooks offer numerous advantages, including accessibility and interactivity, not all students have equal access to technology. This digital divide can create disparities in learning opportunities.

The Future of Ukrainian Textbooks

The future of Ukrainian textbooks is poised for transformation, driven by technological advancements and educational reforms. The increasing integration of technology in education suggests that digital textbooks will become more prevalent, offering interactive and personalized learning experiences.

Moreover, the focus on inclusive education will likely lead to the development of textbooks that cater to diverse learning needs, including resources for students with disabilities. This inclusivity will ensure that all students have equal access to quality education.

Collaboration between educators, publishers, and policymakers will be crucial in shaping the future of Ukrainian textbooks. By working together, stakeholders can ensure that educational materials are relevant, up-to-date, and reflective of the dynamic educational environment.

Conclusion

Ukrainian textbooks are essential components of the educational system, providing students with the knowledge and skills necessary for academic success. They serve as cultural artifacts that promote national identity while fostering critical thinking and creativity in learners. Despite challenges in production and distribution, the future of Ukrainian textbooks looks promising, with potential advancements in technology and inclusivity paving the way for enhanced educational experiences. As Ukraine continues to evolve, so too will its educational resources, ensuring that students are well-equipped to face the challenges of tomorrow.

Q: What are the main types of Ukrainian textbooks?

A: The main types of Ukrainian textbooks include those categorized by educational level (primary, secondary, tertiary), subject matter (humanities, sciences, social sciences, foreign languages), and format (traditional printed books and digital versions).

Q: How do Ukrainian textbooks reflect the culture and identity of Ukraine?

A: Ukrainian textbooks incorporate historical narratives, literary works, and scientific knowledge in the Ukrainian language, thereby promoting cultural heritage and national identity among students.

Q: What challenges do educators face with Ukrainian textbooks?

A: Educators face challenges such as inadequate funding for educational resources, ensuring quality and relevance in textbooks, and addressing the digital divide in access to technology.

Q: How are digital formats impacting Ukrainian textbooks?

A: Digital formats enhance interactivity and accessibility in learning, but they also raise concerns about equity, as not all students may have equal access to the necessary technology.

Q: What role do Ukrainian textbooks play in standardizing education?

A: Ukrainian textbooks help standardize education by adhering to national educational standards, ensuring that students receive a consistent quality of education across different regions.

Q: How can the future of Ukrainian textbooks be improved?

A: The future of Ukrainian textbooks can be improved through collaboration among educators, publishers, and policymakers, focusing on relevant, up-to-date materials and inclusive resources for diverse learning needs.

Q: Are there any initiatives to modernize Ukrainian textbooks?

A: Yes, there are ongoing initiatives aimed at modernizing Ukrainian textbooks, including the incorporation of new teaching methodologies, digital content, and resources that cater to diverse learning styles.

Q: What subjects are commonly covered in Ukrainian textbooks?

A: Common subjects in Ukrainian textbooks include the Ukrainian language, literature, mathematics, sciences (biology, chemistry, physics), history, social studies, and foreign languages.

Q: How do Ukrainian textbooks contribute to critical thinking in students?

A: Modern Ukrainian textbooks incorporate problem-solving activities and project-based learning tasks that encourage students to think critically and apply their knowledge to real-world situations.

Q: What is the significance of inclusive education in developing Ukrainian textbooks?

A: Inclusive education ensures that all students, including those with disabilities, have equal access to quality educational materials, leading to a more equitable learning environment.

ukrainian textbooks: (Re)Constructing Memory: School Textbooks and the Imagination of the Nation James H. Williams, 2014-08-08 This book examines the shifting portrayal of the nation in school textbooks in 14 countries during periods of rapid political, social, and economic change. Drawing on a range of analytic strategies, the authors examine history and civics textbooks, and the teaching of such texts, along with other prominent curricular materials—children’s readers, a required text penned by the head of state, a holocaust curriculum, etc.. The authors analyze the uses of history and pedagogy in building, reinforcing and/or redefining the nation and state especially in the light of challenges to its legitimacy. The primary focus is on countries in developing or transitional contexts. Issues include the teaching of democratic civics in a multiethnic state with little history of democratic governance; shifts in teaching about the Khmer Rouge in post-conflict Cambodia; children’s readers used to define national space in former republics of the Soviet Union; the development of Holocaust education in a context where citizens were both victims and perpetrators of violence; the creation of a national past in Turkmenistan; and so forth. The case studies are supplemented by commentary, an introduction and conclusion.

ukrainian textbooks: *Ukrainian for Undergraduates* Danylo Husar Struk, Nicolae Pavliuc, 1978 *Ukrainian for Undergraduates* is primarily intended as a textbook for students with some previous

knowledge of Ukrainian, whether from the home, Saturday schools, high schools, or an elementary language course at the university level. Since the proficiency level of these students will necessarily be uneven, the textbook covers all the elements of basic morphology. The organization of the material proceeds from the easiest elements (e.g., the nominative case of nouns and the past tense of verbs) to the most complex (e.g., adjectival and adverbial participles). All of the material is presented from the point of view of an English speaker learning Ukrainian. Ukrainian for Undergraduates is divided into twenty-three chapters and an introduction to phonetics. This division readily corresponds to a lesson per week in a twenty-six-week academic year, with the first two weeks devoted to phonetics, and one week remaining for testing and review. Since the aim of the textbook is to instill rules of morphology, only a basic vocabulary of approximately 1300 words is provided, sufficient to allow for grammatical pattern drills and translations. Each chapter is preceded by a vocabulary list of words to be used in the drills and explanations. A short table of contents in each chapter provides a quick reference to the morphological items covered in the lesson as well as to the equivalent terminology in Ukrainian. This, it is hoped, will facilitate a transfer to a Ukrainian-language textbook in the next level of instruction. There are no dialogues or readings in Ukrainian for Undergraduates. This is a conscious omission. Although dialogues play an important part in any conversational approach, the aim of this book necessitates some limitations. The constraints imposed by a limited vocabulary and the relatively short time available for instruction would make dialogues both oversimplified in content and ineffective in reaching the desired goal. In place of dialogues this textbook envisions the use of language tapes to reinforce morphological forms, vocabulary, accentuation, and intonation through audio-oral drills. Suitable language tapes, together with a manual, are available. --Publisher.

ukrainian textbooks: *The Book* F. J. F. Suarez, H. R. Woudhuysen, 2013-10-24 A concise edition of the highly acclaimed Oxford Companion to the Book, this book features the 51 articles from the Companion plus 3 brand new chapters in one affordable volume. The 54 chapters introduce readers to the fascinating world of book history. Including 21 thematic studies on topics such as writing systems, the ancient and the medieval book, and the economics of print, as well as 33 regional and national histories of 'the book', offering a truly global survey of the book around the world, the Oxford History of the Book is the most comprehensive work of its kind. The three new articles, specially commissioned for this spin-off, cover censorship, copyright and intellectual property, and book history in the Caribbean and Bermuda. All essays are illustrated throughout with reproductions, diagrams, and examples of various typographical features. Beautifully produced and hugely informative, this is a must-have for anyone with an interest in book history and the written word.

ukrainian textbooks: *The Russia-Ukraine War: A Manifestation of the 'New Cold War'?* Karim Fathi, 2025-07-27 The war in Ukraine has captivated the world. Current coverage is emotional and largely limited to the military aspects of the war. Contributions from Peace and Conflict Studies have been under-represented in the current debate. They are even subject to anti-pacifist criticism. The question of what is needed for a lasting peace is hardly addressed. This question is all the more important as this war has a highly explosive global dimension in its depth, with indirect links to other territorial conflicts, such as the China-Taiwan conflict. In parallel with the war, there is a growing global bloc between East and West and, since Donald Trump took office in January 2025, an internal split in the West with an uncertain outcome. Some observers speak of a 'New Cold War' with the two superpowers, the US and China, and the EU and Russia as the main players. At the same time, the war seems to be acting as a catalyst for a new multilateral world order. The book outlines in a concise and generally understandable form how a multidimensional analysis of complex conflicts such as the Russia-Ukraine war can be approached and how approaches to conflict intervention and foreign policy can be derived from this complexity. It also provides impetus for the further development of Peace Studies into a multi-paradigmatic field of research.

ukrainian textbooks: *Citizens in the Making in Post-Soviet States* Olena Nikolayenko, 2011-03-02 This book, based on extensive original research, including new survey research amongst

young people, examines the political attitudes of Russian and Ukrainian adolescents without any firsthand experience with communism.

ukrainian textbooks: Ukraine in Crisis ,

ukrainian textbooks: Theoretical and Comparative Perspectives on Nationalism Taras Kuzio, 2007-12-17 This volume brings together 15 articles divided into four sections on the role of nationalism in transitions to democracy, the application of theory to country case studies, and the role played by history and myths in the forging of national identities and nationalisms. The book develops new theories and frameworks through engaging with leading scholars of nationalism: Hans Kohn's propositions are discussed in relation to the applicability of the term 'civic' (with no ethno-cultural connotations) to liberal democracies, Rogers Brubaker over the usefulness of dividing European states into 'civic' and 'nationalizing' states when the former have historically been 'nationalizers', Will Kymlicka on the applicability of multiculturalism to post-communist states, and Paul Robert Magocsi on the lack of data to support claims of revivals by national minorities in Ukraine. The book also engages with 'transitology' over the usefulness of comparative studies of transitions in regions that underwent only political reforms, and those that had 'quadruple transitions', implying simultaneous democratic and market reforms, as well as state and nation building. A comparative study of Serbian and Russian diasporas focuses on why ethnic Serbs and Russians living outside Serbia and Russia reacted differently to the disintegration of Yugoslavia and the USSR. The book dissects the writing of Russian and Soviet history that continues to utilize imperial frameworks of history, analyzes the re-writing of Ukrainian history within post-colonial theories, and discusses the forging of Ukraine's identity within theories of 'Others' as central to the shaping of identities. The collection of articles proposes a new framework for the study of Ukrainian nationalism as a broader research phenomenon by placing nationalism in Ukraine within a theoretical and comparative perspective.

ukrainian textbooks: Narratives of War Nanci Adler, Remco Ensel, Michael Wintle, 2019-05-30 Narratives of War considers the way war and battle are remembered and narrated across space and time in Europe in the twentieth century. The book reflects on how narratives are generated and deployed, and on their function as coping mechanisms, means of survival, commemorative gestures, historical records and evidence. The contributions address such issues as the tension and discrepancy between memory and the official chronicling of war, the relationship between various individuals' versions of war narratives and the ways in which events are brought together to serve varied functions for the narrators and their audiences. Drawing upon the two World Wars, the Spanish Civil War and the ex-Yugoslav wars, and considering narrative genres that include film, schoolbooks, novels, oral history, archives, official documents, personal testimony and memoirs, readers are introduced to a range of narrative forms and examples that highlight the complexity of narrative in relation to war. Approached from a multidisciplinary perspective, and taken together, analysis of these narratives contributes to our understanding of the causes, experience, dynamics and consequences of war, making it the ideal book for those interested in twentieth-century war history and the history of memory and narrative.

ukrainian textbooks: The Burden of the Past Anna Wylegala, Malgorzata Glowacka-Grajper, 2019-01-29 Essays on how chaos, totalitarianism, and trauma have shaped Ukraine's culture: "A milestone of the scholarship about Eastern European politics of memory." —Wulf Kansteiner, Aarhus University In a century marked by totalitarian regimes, genocide, mass migrations, and shifting borders, the concept of memory in Eastern Europe is often synonymous with notions of trauma. In Ukraine, memory mechanisms were disrupted by political systems seeking to repress and control the past in order to form new national identities supportive of their own agendas. With the collapse of the Soviet Union, memory in Ukraine was released, creating alternate visions of the past, new national heroes, and new victims. This release of memories led to new conflicts and "memory wars." How does the past exist in contemporary Ukraine? The works collected in *The Burden of the Past* focus on commemorative practices, the politics of history, and the way memory influences Ukrainian politics, identity, and culture. The works explore contemporary memory culture in Ukraine and the

ways in which it is being researched and understood. Drawing on work from historians, sociologists, anthropologists, psychologists, and political scientists, the collection represents a truly interdisciplinary approach. Taken together, the groundbreaking scholarship collected in *The Burden of the Past* provides insight into how memories can be warped and abused, and how this abuse can have lasting effects on a country seeking to create a hopeful future.

ukrainian textbooks: Shared History, Divided Memory Elazar Barkan, Elizabeth A. Cole, Kai Struve, 2007

ukrainian textbooks: The Intellectual Foundations of Modern Ukraine Andriy Zayarnyuk, Ostap Sereda, 2022-10-28 This is the first synthetic book-length study in English of the Ukrainian nation-building during the long nineteenth century. The narrative follows the evolution of the Ukrainian intellectuals and their ideas from the Age of Enlightenment at the end of the eighteenth century and to the era of Positivist science and social reform at the beginning of the twentieth century. The book focuses on the intellectuals, since in the case of Ukrainians—the nineteenth-century epitome of stateless and overwhelmingly plebeian people—the intellectuals played a pivotal role in defining the Ukrainian national project. The central theme is intellectuals' engagement not only with each other, but also with the people and land they represented. Views of Ukraine from the imperial and world capitals, larger intellectual currents, and geopolitical games are not neglected. Nevertheless, its main focus is on the Ukrainian intellectuals' visions of Ukraine's past, present, and future, their responses to the challenges of modernity, their ideals, agendas, and programmes. *The Intellectual Foundations of Modern Ukraine* is the ideal resource for upper-level undergraduates, postgraduates, and scholars interested in cultural anthropology, political science, political philosophy, and the history of modern Ukraine.

ukrainian textbooks: Collective Memories in War Elena Rozhdestvenskaya, Victoria Semenova, Irina Tartakovskaya, Krzysztof Kosela, 2015-12-14 This edited collection offers an empirical exploration of social memory in the context of politics, war, identity and culture. With a substantive focus on Eastern Europe, it employs the methodologies of visual studies, content and discourse analysis, in-depth interviews and surveys to substantiate how memory narratives are composed and rewritten in changing ideological and political contexts. The book examines various historical events, including the Russian-Afghan war of 1979-89 and World War II, and considers public and local rituals, monuments and museums, textbook accounts, gender and the body. As such it provides a rich picture of post-socialist memory construction and function based in interdisciplinary memory studies.

ukrainian textbooks: The Palgrave Handbook of Conflict and History Education in the Post-Cold War Era Luigi Cajani, Simone Lässig, Maria Repoussi, 2019-06-28 This Handbook provides a systematic and analytical approach to the various dimensions of international, ethnic and domestic conflict over the uses of national history in education since the end of the Cold War. With an upsurge in political, social and cultural upheaval, particularly since the fall of state socialism in Europe, the importance of history textbooks and curricula as tools for influencing the outlooks of entire generations is thrown into sharp relief. Using case studies from 58 countries, this book explores how history education has had the potential to shape political allegiances and collective identities. The contributors highlight the key issues over which conflict has emerged – including the legacies of socialism and communism, war, dictatorships and genocide – issues which frequently point to tensions between adhering to and challenging the idea of a cohesive national identity and historical narrative. Global in scope, the Handbook will appeal to a diverse academic audience, including historians, political scientists, educationists, psychologists, sociologists and scholars working in the field of cultural and media studies.

ukrainian textbooks: Holodomor and Gorta Mór Christian Noack, Lindsay Janssen, Vincent Comerford, 2014-10-01 Ireland's Great Famine or 'an Gorta Mór' (1845–51) and Ukraine's 'Holodomor' (1932–33) occupy central places in the national historiographies of their respective countries. Acknowledging that questions of collective memory have become a central issue in cultural studies, this volume inquires into the role of historical experiences of hunger and

deprivation within the emerging national identities and national historical narratives of Ireland and Ukraine. In the Irish case, a solid body of research has been compiled over the last 150 years, while Ukraine's Holodomor, by contrast, was something of an open secret that historians could only seriously research after the demise of communist rule. This volume is the first attempt to draw these approaches together and to allow for a comparative study of how the historical experiences of famine were translated into narratives that supported political claims for independent national statehood in Ireland and Ukraine. Juxtaposing studies on the Irish and Ukrainian cases written by eminent historians, political scientists, and literary and film scholars, the essays in this interdisciplinary volume analyse how national historical narratives were constructed and disseminated – whether or not they changed with circumstances, or were challenged by competing visions, both academic and non-academic. In doing so, the essays discuss themes such as representation, commemoration and mediation, and the influence of these processes on the shaping of cultural memory.

ukrainian textbooks: *Encyclopedia of Ukraine* Volodymyr Kubijovyc, 1988-12-15 The appearance of Volume II of the Encyclopedia of Ukraine makes the second stage of a major publishing project. Based on twenty-five years' research by more than 100 scholars from around the world, the encyclopedia provides the most essential information about Ukraine and its people, history, geography, economy, and cultural heritage. Volume II contains entries beginning with the letters G to K, among them numerous biographies of historical figures and people currently living in and outside of Soviet Ukraine. Included are some 600 illustrations, maps, and statistical tables. The five volumes of the Encyclopedia of Ukraine will constitute a comprehensive guide to the life and culture of Ukrainians and reflect the manifold relations of Ukrainians with their neighbours and with their non-Ukrainian environments in the various countries to which they immigrated.

ukrainian textbooks: *Nation, Region and History in Post-Communist Transitions* Peter W Rodgers, 2012-05-25 Since independence in 1991, issues of nation and identity have become highly debated topics in Ukraine. This monograph explores not only how national identity is being (re)constructed by the Ukrainian state, but also the processes by which it is negotiated through society. The central argument of this work is that too much attention, concerning identity in Ukraine, has focused on markers of ethnicity and language. Instead, the author advocates a regional approach, engaging with the issue of how Ukraine's regional differences affect nation-building processes. Following the tumultuous events of the 'Orange Revolution', the view of Ukraine as a country inherently 'divided' between 'East' and 'West' has (re)emerged to become a popular explanation for political events. The study outlines the necessity for academics, policymakers and indeed politicians to veer away from this simplistic 'West versus East' divide. The book advocates an analysis of Ukraine's unique brand of regionalism not in terms of divisions, but in terms of regional differences and diversity. The author deconstructs the concept of 'Eastern Ukraine' by focusing on three Ukrainian localities, all adjacent to the Ukrainian-Russian border. The study examines how individuals provide 'their' own understanding of the place of their region within the wider processes of nation building across Ukraine. In doing so, the book develops a 'regional' approach to the study of identity politics in Ukraine.

ukrainian textbooks: *Education and the Politics of Memory in Russia and Eastern Europe* Sergey Rumyantsev, 2025-01-21 This book examines both formal and extracurricular education, and the politics of memory and historical narratives in Armenia, Azerbaijan, Russia, and Ukraine. The misalignment between memory politics and history politics forms a central theme of this book. Structured in three parts, it focuses on school education in the post-Soviet states over the 30 years between the collapse of the Soviet Union and the 2022 Russian invasion of Ukraine. The chapters inquire as to how post-Soviet school education, politics of memory, and history politics became active participants in the production of state-approved ideology, patriotism, and a state-prescribed understanding of the national past. Armed conflicts in the territory of the former USSR not only saw numerous victims and refugees but also the emergence of new borders and unrecognized (de-facto) states, and the annexation of territories. They also contributed to the

creation of new sites of memory, generated their own traditions of commemoration for the heroes and victims of these confrontations, and led to the reconstruction of historical narratives and the construction of new national myths. The research in this book foregrounds how the nationalization of the public space and the reconstruction of national historical narratives in the independent states reflect a desire to monopolize the power to interpret the past, with low tolerance of alternative accounts. In this light, the book covers issues such as the nation-state, Sovietization, national history creation, memory politics, religion, mass media, nationalism and patriotism, and analyzes the relationship of Azerbaijani and Armenian, Russian and Ukrainian societies with their histories and pasts. A novel study on the topic of memory and history writing, this is a timely contribution to the field of Post-Soviet history and Russian and Eastern European Studies. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

ukrainian textbooks: Teaching the Violent Past Elizabeth A. Cole, 2007 With the fate of humankind resting on their shoulders, the PATH team, along with the mortal Keepers and Guides around the world are sent on various quests. Each individual test will push them all to their limits as time slowly ticks down towards Armageddon and their destiny.

ukrainian textbooks: Encyclopedia of Ukraine Danylo Husar Struk, 1993-12-15 Over thirty years in the making, the most comprehensive work in English on Ukraine is now complete: its history, people, geography, economy, and cultural heritage, both in Ukraine and in the diaspora.

ukrainian textbooks: Early Learning of Modern Foreign Languages Marianne Nikolov, 2009-02-27 Modern languages are offered to young learners at an increasingly early age in many countries; yet few publications have focused on what is available to children in different contexts. This volume fills this gap by documenting the state-of-the-art in researching young language learners using a variety of research methods. It demonstrates how young children progress and benefit from an early exposure to modern languages in different educational contexts, and how affective, cognitive, social, linguistic and classroom-related factors interact in the processes. A special strength is the range of languages: although English is the most widely learnt language, chapters focus on various target languages: Croatian, French, English, German, Italian, Spanish and Ukrainian and the contexts include China, Croatia, Greece, Hungary, Ireland, Norway, Poland, the Ukraine, and the United Kingdom.
