an understanding of adult attachment—the most advanced relationship science in existence
today—can help us find and sustain love “Over a decade after its publication, one book on dating has
people firmly in its grip.” —The New York Times We already rely on science to tell us what to eat,
when to exercise, and how long to sleep. Why not use science to help us improve our relationships?
In this revolutionary book, psychiatrist and neuroscientist Dr. Amir Levine and psychologist Rachel
Heller scientifically explain why some people seem to navigate relationships effortlessly, while
others struggle through adult attachment. Pioneered by psychologist John Bowlby in the 1950s, the
field of attachment posits that everyone behaves in one of three distinct ways while in a relationship:

- Anxious people are often preoccupied with their relationships and tend to worry about their partner's ability to love them back
- Avoidant people equate intimacy with a loss of independence and constantly try to minimize closeness
- Secure people feel comfortable with intimacy and are usually warm and loving

attachment workbooks: *Are We There Yet?* Kathleen West, 2022-02-08 A breezy yet affecting read filled with struggle and hope.—People A Good Day LA Pick Among fake Instagram pages, long-buried family secrets, and the horrors of middle school, one suburban mom searches to find herself. Alice Sullivan feels like she's finally found her groove in middle age, but it only takes one moment for her perfectly curated life to unravel. On the same day she learns her daughter is struggling in second grade, a call from her son's school accusing him of bullying throws Alice into a tailspin. When it comes to light that the incident is part of a new behavior pattern for her son, one complete with fake social media profiles with a lot of questionable content, Alice's social standing is quickly eroded to one of "those moms" who can't control her kids. Soon she's facing the very judgement she was all too happy to dole out when she thought no one was looking (or when she thought her house wasn't made of glass). Then her mother unloads a family secret she's kept for more than thirty years, and Alice's entire perception of herself is shattered. As her son's new reputation polarizes her friendships and her family buzzes with the ramification of her mother's choices, Alice realizes that she's been too focused on measuring her success and happiness by everyone else's standards. Now, with all her shortcomings laid bare, she'll have to figure out to whom to turn for help and decide who she really wants to be.
