best self help workbooks: Self-Help Books Sandra K. Dolby, 2010-10-01 Understanding instead of lamenting the popularity of self-help books Based on a reading of more than three hundred self-help books, Sandra K. Dolby examines this remarkably popular genre to define self-help in a way that's compelling to academics and lay readers alike. Self-Help Books also offers an interpretation of why these books are so popular, arguing that they continue the well-established American penchant for self-education, they articulate problems of daily life and their supposed solutions, and that they present their content in a form and style that is accessible rather than arcane. Using tools associated with folklore studies, Dolby then examines how the genre makes use of stories, aphorisms, and a worldview that is at once traditional and contemporary. The overarching premise of the study is that self-help books, much like fairy tales, take traditional materials, especially stories and ideas, and recast them into extended essays that people happily read, think about, try to apply, and then set aside when a new embodiment of the genre comes along.

best self help workbooks: Life Narratives, Creativity, and the Social in the Americas Wilfried Raussert, Susana Rocha Teixeira, 2024-12-02 Resorting to life narratives as a comprehensive umbrella term and embracing hemispheric American studies paradigms, this edited volume explores the interrelations between life narratives, the social world, creativity, and different forms of media to narrate and (re)present the self to see in which way these expressions offer (new) means of (self-) representation within cultural productions from the Americas. Creativity in the context of life narratives nourishes the act of narrating and propels among others the desire to link individual life stories with larger stories of social embeddedness, conditioning, and transformation thus pushing new forms of historiography and other forms of nonfictional writing. Accordingly, the creative impulse fuses individual and collective experience with a larger understanding of the social including the latter's local and global embeddedness. The contributions in this volume analyze the ways in which the dynamics, tensions, and reciprocities between narrative, creativity, and the social world unfold in life narratives from the Americas. In particular, this volume addresses scholars and students of life writing, cultural and literary studies, gender, disability and postcolonial studies with new insights into life narratives from the Americas.
