regeneration workbooks: By God's Design Judith Hartzell, 2015-03-09 What happens when a man finds himself sunk in a downward spiral of risky homosexual acts and he knows no way to escape? And when he is about to lose his prestigious and profitable career, along with his marriage, and even his life? The answer would have been certain tragedy for Alan Medinger if not for a praying wife and the mercy of God. Restored and inspired, he went on to establish a ministry for same-sex-attracted people (Regeneration of Baltimore, Maryland), where he and his wife, Willa, influenced hundreds to turn from homosexuality and seek holiness. Through their work with Exodus International, they influenced thousands more. When quarrels and dissension affected Exodus in Alan's last years, he predicted its demise and explained how ministries would continue to succeed without it. Through Alan and Willa Medinger's story in By God's Design, you will learn the truth about homosexuality, its causes, its healing, and how the church can help.

What happens when a boy grows physically into an adult male but misses some of the experiences and relationships that help form complete manhood? Alan Medinger writes for such men and for those who care about them. Within the context of his own release from homosexuality and his growth into "confident and comfortable" manhood, Medinger offers hope to others. For homosexually oriented men, such growth is an essential but often overlooked step in the process of healing. This ground-breaking study could well change many lives.

regeneration workbooks: Regenerating Regional Culture Jane Frank, 2017-11-28 This book explores the significance of the international book town movement and its impact on contemporary society. It examines how book towns have emerged and how their culture and unique characteristics help to explain a steadily growing phenomenon that has enabled peripheral communities around the world to reclaim their economic futures and impact on the cultural sphere as increasingly powerful sites and sources of creativity. Regenerating Regional Culture assesses why, at a time when the book industry is experiencing a profound transformation, book towns are proliferating in Europe and

across the globe. It acknowledges the role of the book as a catalyst for this significant cultural activity and development. The book is shown to be a unique and pivotal item of cultural consumption, a remarkable artefact and, more than ever before, a springboard for contemporary cultural debate. This work investigates how the reanimation of these 'down-on-their-luck' towns is attracting, through a combination of nostalgia, history and cultural heritage, a growing middle class cohort who seek both intellectual stimulation and opportunities for serious leisure and wellbeing. This book will prove to be a useful resource for understanding the impacts of book towns on art, culture and society while also offering insightful research for those involved in existing or future development of book towns and other community cultural projects.

regeneration workbooks: **Collective Traumas** Conny Mithander, 2007 Collective Traumas is about the traumatic European history of the 20th century - war, genocide, dictatorship, ethnic cleansing - and how individuals, communities and nations have dealt with their dark past through remembrance, historiography and legal settlements. Memories, and especially collective memories, serve as foundations for national identities and are politically charged. Regardless whether memory is used to support or to challenge established ideologies, it is inevitably subject to political tensions. Consequently, memory, history and amnesia tend to be used and abused for different political and ideological purposes. From the perspectives of historical, literary and visual studies the essays focus on how the experiences of war and profound conflict have been represented and remembered in different national cultures and communities. This volume is a vital contribution to memory studies and trauma theory. Collective Traumas is a result of the multidisciplinary research project on Memory Culture that was initiated in 2002 at Karlstad University, Sweden. A previous publication with Peter Lang is Memory Work: The Theory and Practice of Memory (2005).

These and other important questions are answered as the author draws from her own experience and that of many other former lesbians who participated in an extensive survey on same-sex attraction.

regeneration workbooks: **Playing for God** Annie Blazer, 2015-07-24 When sports ministry first emerged in the 1950s and 1960s, its founders imagined male celebrity athletes as powerful salespeople who could deliver a message of Christian strength: "If athletes can endorse shaving cream, razor blades, and cigarettes, surely they can endorse the Lord, too," reasoned Fellowship of Christian Athletes founder Don McClanen. But combining evangelicalism and sport did much more than serve as an advertisement for religion: it gave athletes the opportunity to think about the embodied experiences of sport as a way to experience intimate connection with the divine. As sports ministry developed, it focused on individual religious experiences and downplayed celebrity sales power, opening the door for female Christian athletes to join and eventually dominate sports ministry. Today, women are the majority of participants in sports ministry in the United States. In *Playing for God*, Annie Blazer offers an exploration of the history and religious lives of Christian athletes, showing that evangelical engagement with popular culture can carry unintended consequences. When sport became an avenue for embodied worship, it forced a reckoning with evangelical teachings about the body. Female Christian athletes increasingly turned to their own bodies to understand their religious identity, and in so doing, came to question evangelical mainstays on gender and sexuality. What was once a male-dominated masculinist project of sports engagement became a female-dominated movement that challenged evangelical ideas on femininity, marriage hierarchy, and the sinfulness of homosexuality. Though evangelicalism has not changed sporting culture, for those involved in sports ministry, sport has changed evangelicalism.
