reception workbooks: International Bestsellers and the Online Reconfiguring of

National Identity Rachel Noorda, Millicent Weber, Melanie Ramdarshan Bold, 2024-05-23

International bestsellers are the ideal sites for examining the complicated relationship between literary culture and national identity. Despite the transnational turns in both literary studies and book history, place is still an important configurator of twenty-first-century book reception. Books are crucial to national identity and catalysts of nationalist movements. On an individual level, books enable readers to shape and maintain their own national identities. This Element explores how contemporary readers' understandings of nation, race/ethnicity, gender, and class continue to shape their reading, using as case studies the online reception of three bestseller titles-Liane Moriarty's *Big Little Lies* (Australia), Zadie Smith's *NW* (UK), and Kevin Kwan's *Crazy Rich Asians* (USA). In doing so, this Element demonstrates the need for and articulates a transnational conceptualisation of the relationship between reader identity and reception.

Australian Books and Authors in the American Marketplace 1840s-1940s explores how Australian writers and their works were present in the United States before the mid twentieth century to a much greater degree than previously acknowledged. Drawing on fresh archival research and combining the approaches of literary criticism, print culture studies and book history, David Carter and Roger Osborne demonstrate that Australian writing was transnational long before the contemporary period. In mapping Australian literature's connections to British and US markets, their research challenges established understandings of national, imperial and world literatures. Carter and Osborne examine how Australian authors, editors and publishers engaged productively with their American counterparts, and how American readers and reviewers responded to Australian works. They consider the role played by British publishers and agents in taking Australian writing to America, and how the international circulation of new literary genres created new opportunities for novelists to move between markets. Some of these writers, such as Christina Stead and Patrick White, remain household names; others who once enjoyed international fame, such as Dale Collins and Alice Grant Rosman, have been largely forgotten. The story of their books in America reveals how culture,

commerce and copyright law interacted to create both opportunities and obstacles for Australian writers.
