workbooks are most often used with: **Off the Books** J. Peder Zane, 2015-04-06 Head Off the Books in this collection of newspaper columns, where J. Peder Zane uses classic and contemporary literature to explore American culture and politics. The book review editor for the Raleigh, North Carolina News & Observer from 1996 to 2009, Zane demonstrates that good books are essential for understanding ourselves and the world around us. The one hundred and thirty columns gathered in Off the Books find that sweet spot where literature's eternal values meet the day's current events. Together they offer a literary overview of the ideas, issues, and events shaping our culture—from 9/11 and the struggle for gay rights to the decline of high culture and the rise of sensationalism and solipsism. As they plumb and draw from the work of leading writers—from William Faulkner, Knut Hamsun, and Eudora Welty to Don DeLillo, Lydia Millet, and Philip Roth—these columns make an argument not just about the pleasure of books, but about their very necessity in our lives and culture.

workbooks are most often used with: Erasmus and His Books Egbertus Van Gulik, 2016-06-26 What became of Erasmus' books? The most famous scholar of his day died in peaceful prosperity and in the company of celebrated and responsible friends. His zeal for useful books was insatiable. Indeed, he had taken care to insure that after his death they would pass to an appreciative noble owner, yet after his death their fate was unknown. Erasmus and His Books provides the most comprehensive evidence available about the books of Erasmus of Rotterdam – the books he owned and his attitude towards them, when and how he acquired them, how he housed, used, and cared for them, and how, from time to time, he disposed of them. Part 1 details the formation, growth, scope, and arrangement of Erasmus' library and opens the door to a new understanding of the more intimate side of his daily life as a scholar at home with his books, friends, publishers, and booksellers. Part 2 presents a carefully annotated catalogue, the *Versandliste*, of the more than 400 books in Erasmus' possession at one point. Drawing upon his command of bibliographical data and his extensive knowledge of Erasmus' correspondence and related records Egbertus van Gulik proposes as precise an identification of each of the titles as the evidence will allow. Van Gulik's insightful discoveries tell us what can be known of books in Erasmus' working library and how he used them and will be of interest to students of the northern Renaissance, the history of the book, and the history of learning.
